Following the huge success of his blockbuster weight-loss program, McKenna has created a groundbreaking new book-and-CD set that reveals the secrets of getting regular, deep, refreshing sleep--and banishing insomnia for good. This book explores the complexities of interacting with digital technologies in the everyday flow of practices in schools, museums, and the home. In particular, the authors pay attention to the material conditions of such practices via the exploration of media discourses on information and communication technologies in the classroom; the ongoing digitization of the school; the use of video chat for language learning; the instantiation of CrossActionSpaces in an urban science classrooms; the development of symbolic technologies such as the Carbon Footprint Calculator; the design of apps and virtual museums for learning science; the use of text message tools for collaborative learning in teacher education and the design, implementation, and evaluation of Augmented Reality apps in outdoor learning. The book is grounded in case studies presented by scholars at the workshop, "Changing Teaching and Learning Practices in Schools with Tablet-Mediated Collaborative Learning: Nordic, European and International Views" and the workshop "Emergent Practices and Material Conditions in Tablet-mediated Collaborative Learning and Teaching" both of which have been held at the Computer-Supported Collaborative Learning conference (CSCL). This volume brings together inspirational and high-quality chapters that raise a range of important ideas and showcase the importance of looking beyond technology-enhanced learning. Taken together, this volume unpacks a variety of everyday situations by engaging with what is really happening with digital technologies rather than what is expected to happen with them in educational settings. The take-away message is a call for research on learning, teaching, and digital technologies that enables engagement with the materiality of educational practices and, in particular, their constitutive relationships that configure the contemporary educational practices of the digital age. As the first book ever published for public administration statistics courses, APPLIED STATISTICS FOR PUBLIC AND NONPROFIT ADMINISTRATION makes a difficult subject accessible to students and practitioners of public administration who have little background in statistics or research methods. Steeped in experience and practice, this landmark text remains the first and best in research methods and statistics for students and practitioners in public--and nonprofit--administration. All statistical techniques used by public administration professionals are covered, and all examples in the text relate to public administration and the nonprofit sector. The text avoids jargon and formulae; instead, it uses a step-by-step approach that facilitates student learning. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. This book was prepared as the Final Publication of COST Action IC0703 "Data Traffic Monitoring and Analysis: theory, techniques, tools and applications for the future networks". It contains 14 chapters which demonstrate the results, quality, and the impact of European research in the field of TMA in line with the scientific objective of the Action. The book is structured into three parts: network and topology measurement and modelling, traffic classification and anomaly detection, quality of experience. NEW YORK TIMES BESTSELLER From Mayor Michael Bloomberg and former head of the Sierra Club Carl Pope comes a manifesto on how the benefits of taking action on climate change are concrete, immediate, and immense. They explore climate change solutions that will make the world healthier and more prosperous, aiming to begin a new type of conversation on the issue that will spur bolder action by cities, businesses, and citizens—and even, someday, by Washington. "Climate of Hope is an inspiring must read." —Former Vice President Al Gore, Chairman of The Climate Reality Project "Climate change threatens to reshape the future of our world's population centers. Bloomberg and Pope have been leaders on fortifying our cities against this threat, and their book proves that victory is possible—and imperative." —Leonardo DiCaprio "If Trump is looking for a blueprint, he could not do better than to read a smart new book, Climate of Hope." —Thomas Friedman in The New York Times ~ The 2016 election left many people who are concerned about the environment fearful that progress on climate change would come screeching to a halt. But not Michael Bloomberg and Carl Pope. Bloomberg, an entrepreneur and former mayor of New York City, and Pope, a lifelong environmental leader, approach climate change from different perspectives, yet they arrive at similar conclusions. Without agreeing on every point, they share a belief that cities, businesses, and citizens can lead—and win—the battle against climate change, no matter which way the political winds in Washington may shift. In Climate of Hope, Bloomberg and Pope offer an optimistic look at the challenge of climate change, the solutions they believe hold the greatest promise, and the practical steps that are necessary to achieve them. Writing from their own experiences, and sharing their own stories from government, business, and advocacy, Bloomberg and Pope provide a road map for tackling the most complicated challenge the world has ever faced. Along the way, they turn the usual way of thinking about climate change on its head: from top down to bottom up, from partisan to pragmatic, from costs to benefits, from tomorrow to today, and from fear to hope. A Young People's History of the United States brings to US history the viewpoints of workers, slaves, immigrants, women, Native Americans, and others whose stories, and their impact, are rarely included in books for young people. A Young People's History of the United States is also a companion volume to The People Speak, the film adapted from A People's History of the United States and Voices of a People's History of the United States. Beginning with a look at Christopher Columbus's arrival through the eyes of the Arawak Indians, then leading the reader through the struggles for workers' rights, women's rights, and civil rights during the nineteenth and twentieth centuries, and ending with the current protests against continued American imperialism, Zinn in the volumes of A Young People's History of the United States presents a radical new way of understanding America's history. In so doing, he reminds readers that America's true greatness is shaped by our dissident voices, not our military generals. "Annie, the Cinderella of the family, lives in the shabby Victorian vicarage type house where the family was brought up. Reg, her brother, and his wife Sarah come to stay for a week end so that she may go away for a 'rest.' The general idea is that Annie ought to pair off with Tom. But for this week end it is Norman, the raffish assistant librarian husband of Annie's sister Ruth, with whom she planned to go. They were to meet secretly but Norman turns up early. When Annie calls the whole thing off Norman decides to stay on at the house and gets roaring drunk"--Publisher's website. This book constitutes the refereed proceedings of the 7th International Workshop on Traffic Monitoring and Analysis, TMA 2015, held in Barcelona, Spain, in April 2015. The 16 full papers presented in this volume were carefully reviewed and selected from 54 submissions. The contributions are organized in topical sections on measurement tools and methods; mobile and wireless; Web; security; and new protocols. Especially suitable for birthdays, for Christmas or just as a nice attention for your loved one. A must-read for students in public administration and nonprofit management programs! Managing Human Behavior in Public and Nonprofit Organizations, Fourth Edition, is designed to help students understand, manage, and influence the behavior of others in the workplace. Esteemed authors Robert B. Denhardt, Janet V. Denhardt, and Maria P. Aristigueta take an action-oriented approach by using real-world circumstances within public and nonprofit organizations to illustrate key concepts. Important topics such as stress, decision making, motivation, leadership, communication, teams, and change give students a foundational understanding of the basic issues that affect human behavior. In addition to new cases and examples from the public and nonprofit sectors, the Fourth Edition features new material on leadership and organizational change, cultural diversity and generational diversity, and positive organizational behavior. Howard Zinn's A People's History of the United States has sold more than 2.5 million copies. It is pushed by Hollywood celebrities, defended by university professors who know better, and assigned in high school and college classrooms to teach students that American history is nothing more than a litany of oppression, slavery, and exploitation. Zinn's history is popular, but it is also massively wrong. Scholar Mary Grabar exposes just how wrong in her stunning new book Debunking Howard Zinn, which demolishes Zinn's Marxist talking points that now dominate American education. In Debunking Howard Zinn, you'll learn, contra Zinn: How Columbus was not a genocidal maniac, and was, in fact, a defender of Indians Why the American Indians were not feminist-communist sexual revolutionaries ahead of their time How the United States was founded to protect liberty, not white males' ill-gotten wealth Why Americans of the "Greatest Generation" were not the equivalent of Nazi war criminals How the Viet Cong were not well-meaning community leaders advocating for local self-rule Why the Black Panthers were not civil rights leaders Grabar also reveals Zinn's bag of dishonest rhetorical tricks: his slavish reliance on partisan history, explicit rejection of historical balance, and selective quotation of sources to make them say the exact opposite of what their authors intended. If you care about America's past—and our future—you need this book. This concise text is a reader friendly primer to the fundamentals of administrative responsibility and ethics. Your students will come away with a clear understanding of why ethics are important to administrators in governmental and non-profit organizations, and how these administrators can relate their own personal values to the norms of the public sector. Since the publication of the first edition of The Ethics Primer, there has been significant change in the climate of public affairs that impacts the discussion of ethics for those who serve the public in governmental and nonprofit organizations. The new edition reflects those changes in three major areas:

- Ethics in an era of increasing tension between political leaders and administrators over the role and size of government.
- Ethical choices in making fiscal cuts or imposing new taxes in the face of the greatest economic crisis since the Depression.
- Ethical challenges to established practices in public organizations.

The Second Edition also offers thoroughly updated data and sources throughout, as well as examples that incorporate new research and new developments in government and politics. The Second Edition of The Ethics Primer for Public Administrators in Government and Nonprofit Organizations:

- Introduces readers to the fundamentals of administrative responsibility and provides comprehensive coverage of the important elements of ethics.
- Features an accessible and interactive approach to maximize understanding of the subject.
- Includes information on the nature of public service and the ethical expectations of public administrators, as well factors that may lead to unethical behavior.
- Written from a political perspective, the book addresses questions that are highly salient to persons working in government and nonprofits.
- Offers helpful ways to link ethics and management in order to strengthen the ethical climate in a public organization.

The best-selling comprehensive history of the world, from the perspective of struggling peoples throughout the ages—now with new material and a foreword by Howard Zinn From the earliest human societies to the Holy Roman Empire, from the Middle Ages to the Enlightenment, from the Industrial Revolution to the end of the twentieth century, Chris Harman provides a brilliant and comprehensive history of the human race. Eschewing the standard accounts of “Great Men,” of dates and kings, Harman offers a groundbreaking counter-history, a breathtaking sweep across the centuries in the tradition of “history from below.” In a fiery narrative, he shows how ordinary men and women were involved in creating and changing society and how conflict between classes was often at the core of these developments. While many scholars see the victory of capitalism as now safely secured, Harman explains the rise and fall of societies and civilizations throughout the ages and demonstrates that history moves ever onward in every age. This magisterial study is essential reading for anyone interested in how society has changed and developed and the possibilities for further radical progress. “I have had many people ask me if there is a book which does for world history what my book A People’s History of the United States does for this country. I always responded that I know of only one book that accomplishes this extremely difficult task, and that is Chris Harman’s A People’s History of the World.” —Howard Zinn Now part of the HBO docuseries Exterminate All the Brutes, written and directed by Raoul Peck The 20th anniversary edition of a pioneering classic that explores the contexts in which history is produced—now with a new foreword by renowned scholar Hazel Carby Placing the West’s failure to acknowledge the Haitian Revolution—the most successful slave revolt in history—alongside denials of the Holocaust and the debate over the Alamo, Michel-Rolph Trouillot offers a stunning meditation on how power operates in the making and recording of history. This modern classic resides at the intersection of history, anthropology, Caribbean, African-American, and post-colonial studies, and has become a staple in college classrooms around the country. In a new foreword, Hazel Carby explains the book’s enduring importance to these fields of study and introduces a new generation of readers to Trouillot’s brilliant analysis of power and history’s silences. Endorsed by Cambridge Assessment International Education Now including Brian Sargent in the expert author team, alongside first edition authors Graham Brown and David Watson, this book has been fully revised and updated to cover every part of the latest Cambridge IGCSE ICT (0417) syllabus. - Written by experts, who bring a wealth of theoretical knowledge and practical experience to both the book and the CD - Ensures that students are fully prepared for both the written theory paper as well as the two practical papers - Covers each section of the syllabus with clear explanations and plenty of tasks and activities Every Student's Book includes a CD that contains source files for the tasks and activities. Concept drawings created for the computer game Journey. The modern age with its emphasis on technical rationality has enabled a new and dangerous form of evil--administrative evil. Unmasking Administrative Evil discusses the overlooked relationship between evil and public affairs, as well as other fields and professions in public life. The authors argue that the tendency toward administrative evil, as manifested in acts of dehumanization and genocide, is deeply woven into the identity of public affairs. The common characteristic of administrative evil is that ordinary people within their normal professional and administrative roles can engage in acts of evil without being aware that they are doing anything wrong. Under conditions of moral inversion, people may even view their evil activity as good. In the face of what is now a clear and present danger in the United States, this book seeks to lay the groundwork for a more ethical and democratic public life; one that recognizes its potential for evil, and thereby creates greater possibilities for avoiding the hidden pathways that lead to state-sponsored dehumanization and destruction. What's new in the Fourth Edition of Unmasking Administrative Evil: UAE is updated and revised with new scholarship on administrative ethics, evil, and contemporary politics. The authors include new cases on the dangers of market-based governance, contracting out, and deregulation. There is an enhanced focus on the potential for administrative evil in the private sector. The authors have written a new Afterword on administrative approaches to the aftermath of evil, with the potential for expiation, healing, and reparations. A guide to Windows 7 is organized by feature, furnishing details on all new features, tools, and enhancements, including the multimedia, security, search, and data organization capabilities, and offering helpful tips on system setup, upgrading, and troubleshooting. Whilst most facets of the Occupation of Japan have attracted much scholarly debate in recent decades, this is not the case with reforms relating to public health. The few studies of this subject largely follow the celebratory account of US-inspired advances, strongly associated with Crawford Sams, the key figure in the Occupation charged with carrying them out. This book tests the validity of this dominant narrative, interrogating its chief claims, exploring the influences acting on it, and critically examining the reform’s broader significance for the Occupation and its legacies for both Japan and the US. The book argues that rather than presiding over a revolution in public health, the Public Health and Welfare Section, headed by Sams, recommended methods of epidemic disease control and prevention that were already established in Japan and were not the innovations that they were often claimed to be. Where high incidence of such endemic diseases as dysentery and tuberculosis reflected serious socio-economic problems or deficiencies in sanitary infrastructure, little was done in practice to tackle the fundamental problems of poor water quality, the continued use of night soil as fertilizer and pervasive malnutrition. Improvements in these areas followed the trajectory of recovery, growth and rising prosperity in the 1950s and 1960s. This book will be important reading for anyone studying Japanese History, the History of Medicine, Public Health in Asia and Asian Social Policy. New technology has brought with it new tools for learning, and research has shown that the educational potential of video games resonates with teachers and pupils alike. Klopfer here describes the largely untapped potential of mobile learning games to make a substantial impact on education. for Research on Nonprofit Organizations and Voluntary Action (ARNOVA), former editor of the Nonprofit Management and Leadership Journal, and the author of numerous publications, including *Breaking Even: Financial Management in Nonprofit Human Services* and *The Commons: New Perspectives on Nonprofit Organizations, Voluntary Action, and Philanthropy*. -- Uses case studies, surveys, and literature reviews to critically examine how gaming, simulation, and virtualization are being used to improve teamwork and leadership skills in students, and create engaging communities of practice. This volume discusses a framework for deploying and assessing these technologies. How six great thinkers and Christian theologians addressed issues surrounding wealth, charitable giving, and human purpose. *Wealth and the Will of God* looks at some of the spiritual resources of the Christian tradition that can aid serious reflection on wealth and giving. Beginning with Aristotle—who is crucial for understanding later Christian thought—the book discusses Aquinas, Ignatius, Luther, Calvin, and Jonathan Edwards. Though the ideas vary greatly, the chapters are organized to facilitate comparisons among these thinkers on issues of ultimate purposes or aspirations of human life; on the penultimate purposes of love, charity, friendship, and care; on the resources available to human beings in this life; and finally on ways to connect and implement in practice our identified resources with our ultimate ends. Here in their own words are Frederick Douglass, George Jackson, Chief Joseph, Martin Luther King Jr., Plough Jogger, Sacco and Vanzetti, Patti Smith, Bruce Springsteen, Mark Twain, and Malcolm X, to name just a few of the hundreds of voices that appear in *Voices of a People's History of the United States*, edited by Howard Zinn and Anthony Arnove. Paralleling the twenty-four chapters of Zinn's *A People's History of the United States*, *Voices of a People's History* is the long-awaited companion volume to the national bestseller. For *Voices*, Zinn and Arnove have selected testimonies to living history—speeches, letters, poems, songs—left by the people who make history happen but who usually are left out of history books—women, workers, nonwhites. Zinn has written short introductions to the texts, which range in length from letters or poems of less than a page to entire speeches and essays that run several pages. *Voices of a People's History* is a symphony of our nation's original voices, rich in ideas and actions, the embodiment of the power of civil disobedience and dissent wherein lies our nation's true spirit of defiance and resilience. XML has become the standard for all kinds of integration and deployment of applications, regardless of the technology platform. *XML & Related Technologies* covers all aspects of dealing with XML, both from a conceptual as well as from a practical po
