The Specter of the Jews Aug 28 2020 In the generation after Constantine the Great elevated Christianity to a dominant position in the Roman Empire, his nephew, the Emperor Julian, sought to reinstate the old gods to their former place of prominence--in the face of intense opposition from the newly powerful Christian church. In early 363 c.e., while living in Syrian Antioch, Julian redoubled his efforts to hellenize the Roman Empire by turning to an unlikely source: the Jews. With a war against Persia on the horizon, Julian thought it crucial that all Romans propitiate the true gods and gain their favor through proper practice. To convince his people, he drew on Jews, whom he characterized as Judeans, using their scriptures, institutions, practices, and heroes sometimes as sources for his program and often as models to emulate. In *The Specter of the Jews*, Ari Finkelstein examines Julian's writings and views on Jews as Judeans, a venerable group whose religious practices and values would help delegitimize Christianity and, surprisingly, shape a new imperial Hellenic pagan identity.

Code of Federal Regulations Jul 27 2020 Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries.

Testimonia et Indices Oct 30 2020 The Bibliotheca Teubneriana, established in 1849, has evolved into the world's most venerable and extensive series of editions of Greek and Latin literature, ranging from classical to Neo-Latin texts. Some 4-5 new editions are published every year. A team of renowned scholars in the field of Classical Philology acts as advisory board: Gian Biagio Conte (Scuola Normale Superiore di Pisa) Marcus Deufert (Universität Leipzig) James Diggle (University of Cambridge) Donald J. Mastronarde (University of California, Berkeley) Franco Montanari (Università di Genova) Heinz-Günther Nesselrath (Georg-August-Universität Göttingen) Dirk Obbink (University of Oxford) Oliver Primavesi (Ludwig-Maximilians Universität München) Michael D. Reeve (University of Cambridge) Richard J. Tarrant (Harvard

University) Formerly out-of-print editions are offered as print-on-demand reprints. Furthermore, all new books in the Bibliotheca Teubneriana series are published as eBooks. The older volumes of the series are being successively digitized and made available as eBooks. If you are interested in ordering an out-of-print edition, which hasn't been yet made available as print-on-demand reprint, please contact us: Kerstin.Haensch@degruyter.com All editions of Latin texts published in the Bibliotheca Teubneriana are collected in the online database BTL Online.

The Routledge Encyclopedia of the Historical Jesus Jan 01 2021

This Encyclopedia brings together the vast array of historical research into the reality of the man, the teachings, the acts, and the events ascribed to him that have served as the foundational story of one of the world's central religions. This kind of historiography is not biography. The historical study of the Jesus stories and the transmission of these stories through time have been of seminal importance to historians of religion. Critical historical examination has provided a way for scholars of Christianity for centuries to analyze the roots of legend and religion in a way that allows scholars an escape from the confines of dogma, belief, and theological interpretation. In recent years, historical Jesus studies have opened up important discussions concerning anti-Semitism and early Christianity and the political and ideological filtering of the Jesus story of early Christianity through the Roman empire and beyond. Entries will cover the classical studies that initiated the new historiography, the theoretical discussions about authenticating the historical record, the examination of sources that have led to the western understanding of Jesus' teachings and disseminated myth of the events concerning Jesus' birth and death. Subject areas include: the history of the historical study of the New Testament: major contributors and their works theoretical issues and concepts methodologies and criteria historical genres and rhetorical styles in

the story of Jesus historical and rhetorical context of martyrdom and messianism historical teachings of Jesus teachings within historical context of ethics titles of Jesus historical events in the life of Jesus historical figures in the life of Jesus historical use of Biblical figures referenced in the Gospels places and regions institutions the history of the New Testament within the culture, politics, and law of the Roman Empire.

Fragmented Memory Jul 07 2021 Chance, in addition to the unavoidable ambiguity caused by time, is one of the main guilty parties in the transmission of ancient texts – or lack thereof. However, the same cannot be said for what concerns the mechanisms of selection and loss of historical and literary memory, where the voluntary awareness of obscuring is often part of a precise aim, thus leading the cultural memory of a literate society to become fragmented. The present volume explores the devices and criteria of selection and loss in Ancient and Medieval texts and the subsequent fragmentation of such literature, but it also addresses the questions of the *damnatio memoriae*, of literary strategies such as reticence and omission, as well as of known texts deemed lost but re-found thanks to state-of-the-art methods in digitization. The many and diverse nuances of the concepts of omission, selection, and loss throughout Ancient and Medieval literature and history are illustrated through a number of case studies in the four sections of this volume, each examining a different facet of the topic: ‘Mechanisms and criteria of textual loss and selection’, ‘Lost texts re-discovered’, ‘Voluntary omissions and desire for oblivion’, and ‘Re-working the known’.

Quark Matter Sep 21 2022 From the Editors Preface: "Quark Matter 1987 was attended by about 250 scientists, representing 75 research institutions around the world - the scientific community engaged in experimental and theoretical studies of high energy nuclear collisions. The central theme of the meeting was the possibility of achieving extreme energy densities in extended systems of strongly interacting matter - with the ultimate aim of creating in the laboratory a deconfined state of matter, a state in which quarks and gluons attain the active degrees of freedom. High energy accelerator beams and cosmic radiation projectiles provide the experimental tools for this endeavour; on the theoretical side, it is intimately connected to recent developments in the non-perturbative study of quantum chromodynamics. Phase transitions between hadronic matter and quark-gluon plasma are of basic interest also for our understanding of the dynamics of the early universe ... A very special feature of this Sixth Quark Matter Conference was the advent of the first experimental results from dedicated accelerator studies. These were conducted during 1986/87 at the AGS of Brookhaven National Laboratory ... and at the CERN SPS ... An intense discussion of these data formed the main activity of the meeting.

Electrical Engineer's Reference Book May 05 2021 For ease of use, this edition has been divided into the following subject sections: general principles; materials and processes; control, power electronics and drives; environment; power generation; transmission and distribution; power systems; sectors of electricity use. New chapters and major revisions include: industrial instrumentation; digital control systems; programmable controllers; electronic power conversion; environmental control; hazardous area technology; electromagnetic compatibility; alternative energy sources; alternating current generators; electromagnetic transients; power system planning; reactive power plant and FACTS controllers; electricity economics and trading; power quality. *An essential source of techniques, data and principles for all practising electrical engineers *Written by an international team of experts from engineering companies and universities *Includes a major new section on control systems, PLCs and microprocessors

Inductive Logic Programming May 25 2020 This book constitutes the refereed proceedings of the 11th International Conference on Inductive Logic Programming, ILP 2001, held in Strasbourg, France in September 2001. The 21 revised full papers presented were carefully reviewed and selected from 37 submissions. Among the topics addressed are data mining issues for multi-relational databases, supervised learning, inductive inference, Bayesian reasoning, learning refinement operators, neural network learning, constraint satisfaction, genetic algorithms, statistical machine learning, transductive inference, etc.

Fiddlers Philharmonic Jan 13 2022 At last the excitement of traditional folk fiddling can be experienced by your entire string orchestra! Written by two renowned educators, this fun and motivating collection of 16 cross-cultural fiddle tunes is presented in

a unique format that makes it perfect for players of any level or age. Each tune includes a solo version, followed by a 3-part "arrangement" for group performance. Chord symbols, for improvisation additional instruments (guitar, mandolin, etc.) are also included.

Thermoplastics Feb 14 2022 The overall aim of this book is to aid the process of sourcing and selecting appropriate thermoplastic polymers. There are now a wide diversity of thermoplastics offered for commercial uses. At one end of the range are the high-volume commodity materials for short life consumer applications. Whereas at the other end are the high value engineering materials; with significant levels of mechanical, physical and electrical performance. Within this publication, the generic groups of thermoplastics can be identified, along with their respective attributes and limitations. All thermoplastics are available in different grades. The constituents selected to form a grade are chosen to modify aspects of material behaviour, both during processing and in the final moulded form. The directory addresses materials which can be obtained in granular, powder or paste form for subsequent processing. Information is not provided directly on semi-finished product forms, such as films, fibres, sheet or profiles, other than when inferred from the processing descriptions of specified grades. The directory covers virgin or compounded material. It does not specifically address reclaimed or recycled grades. Data is provided for the mechanical and physical properties of moulded grades as processed by the route intended by the primary manufacturer (M) or compounder (C). Material grades can be obtained from a number of sources; either the original polymer manufacturer or a recognised compounder who produces a range of grades.

Topics in Stereochemistry May 17 2022 This seminal series, first edited by Ernest Eliel, responsible for some of the major advances in stereochemistry and the winner of the ACS Priestley Medal in 1996, provides coverage of the major developments of the field of stereochemistry. The scope of this series is broadly defined to encompass all fields of chemical and biological sciences that are founded on molecular and supramolecular interactions. Insofar as chemical, physical, and biological properties are determined by molecular shape and structure, the importance of stereochemistry is fundamental to and consequential for all natural sciences. Topics in Stereochemistry serves as a multidisciplinary series that enriches all of chemistry. Aimed at advanced students, university professors and teachers as well as researchers in pharmaceutical, agricultural, biotechnological, polymer, materials, and fine chemical industries, Topics in Stereochemistry publishes definitive and scholarly reviews in stereochemistry and has long been recognized as the gold standard reference work in this field. Covering the effect of chirality on all aspects of molecular interaction from the fundamental physical chemical properties of molecules and their molecular physics to the application of chirality in new areas such as its applications in materials science, Topics in Stereochemistry explores a wide variety of properties, both physical and chemical of isomers with a view to their applications in a number of disciplines from biochemistry to materials science.

FrC 19.2 Antiphanes Fr. 101–193 Apr 16 2022 Antiphanes is one of the most important writers of the Middle Attic comedy. His plays deal with matters connected to mythological subjects, although others referenced particular professional and national persons or characters, while other plays focused on the intrigues of personal life. This volume contains a critical text, translation and complete philological, literary and historical commentary on the fragments of Antiphanes' Zakyntios and subsequent plays, along with the fragments without a play-title (including dubia).

A Century of Aviation Jul 19 2022 Fascinating, informative and insightful, *A Century of Aviation: Worldwide Commercial and Military* offers a comprehensive overview of the development of aircraft for over 100 years. With an emphasis on the war periods, from World War I through the present, this is a book that is required reading for any fan of flying. The rich history and inventive advancements in the world of aviation comes alive in this thoroughly enjoyable volume. George E. Slagley, P.E. (Retired) grew up on a farm in Clay County, Illinois and currently resides in Greenville, Alabama. He spent four years in the Navy as an aircraft mechanic on two Aircraft Carriers. He also served in the Navy Reserve for eight years as a Flight Engineer. Mr. Slagley joined the Army, first as a technician, and then received his degree in Aircraft Maintenance Engineering, which converted his position to Supervisory General Engineer. Mr. Slagley graduated from Parks College of St Louis University in December 1969 with a BS and a MBA from Webster University in 1976. He received certification as a Professional Engineer (P.E.) from California. He was a past President of the Alabama Society of Professional Engineers, The TRADOC Professional Engineer of the Year in 1984, and the Alabama Professional Engineer Of the Year 1993/1994. Mr. Slagley

spent ten years as an Aerospace Engineer, Technical Advisor (Consultant) at Ft. Rucker, Alabama, and then spent nine years in a business at Dothan, AL where he received The Who's Who in the World certification. [http: //sbpra.com/GeorgeESlagle](http://sbpra.com/GeorgeESlagle)

Recreation Sites in Southwestern National Forests and Grasslands, RG-R3-16-6, May 2014 Feb 26 2023

An Inventory of Archaic and Classical Poleis Oct 10 2021 This is the first ever documented study of the 1,035 identifiable Greek city states (poleis) of the Archaic and Classical periods (c.650-325 BC). Previous studies of the Greek polis have focused on Athens and Sparta, and the result has been a view of Greek society dominated by Sophokles', Plato's, and Demosthenes' view of what the polis was. This study includes descriptions of Athens and Sparta, but its main purpose is to explore the history and organization of the thousand other city states. The main part of the book is a regionally organized inventory of all identifiable poleis covering the Greek world from Spain to the Caucasus and from the Crimea to Libya. This inventory is the work of 47 specialists, and is divided into 46 chapters, each covering a region. Each chapter contains an account of the region, a list of second-order settlements, and an alphabetically ordered description of the poleis. This description covers such topics as polis status, territory, settlement pattern, urban centre, city walls and monumental architecture, population, military strength, constitution, alliance membership, colonization, coinage, and Panhellenic victors. The first part of the book is a description of the method and principles applied in the construction of the inventory and an analysis of some of the results to be obtained by a comparative study of the 1,035 poleis included in it. The ancient Greek concept of polis is distinguished from the modern term 'city state', which historians use to cover many other historic civilizations, from ancient Sumeria to the West African cultures absorbed by the nineteenth-century colonializing powers. The focus of this project is what the Greeks themselves considered a polis to

be.

Acharnians Sep 28 2020 Aristophanes' Acharnians was performed at the Lenaia festival in Athens in 425 BCE. O Acharnians itself, at any rate, took first place and is generally regarded as one of Aristophanes' two or three most brilliant surviving comedies. Olson offers the first complete new scholarly edition of the play in almost a century.

Brill's Companion to Apollonius Rhodius Jan 25 2023 This 2nd edition of the Companion to Apollonius Rhodius, comprising now nineteen articles by leading scholars from Europe and America, aims at giving an up-to-date outline of the scholarly discussion in these areas and to provide a survey of recent and current trends in Apollonian studies which will be useful to students of Hellenistic poetry.
