Reflecting the latest New York State curriculum change, this brand-new addition to Barron's Let's Review series covers all topics prescribed by the New York State Board of Regents for the new Integrated Algebra Regents exam, which replaces the Math A Regents exam. This book stresses rapid learning, using many step-by-step demonstration examples, helpful diagrams, enlightening "Math Fact" summaries, and graphing calculator approaches. Fourteen chapters review the following topics: sets, operations, and algebraic language; linear equations and formulas; problem solving and technology; ratios, rates, and proportions; polynomials and factoring; rational expressions and equations; radicals and right triangles; area and volume; linear equations and graphing; functions, graphs, and models; systems of linear equations and inequalities; quadratic and exponential functions; statistics and visual representations of data; and counting and probability of compound events. Exercise sections within each chapter feature a large sampling of Regents-type multiple-choice and extended response questions, with answers at the back of the book. Students will find this book helpful when they need additional explanation and practice on a troublesome topic, or when they want to review specific topics before taking a classroom test or the Regents exam. Teachers will value it as a lesson-planning aid, and as a source of classroom exercises, homework problems, and test questions. Every NYS Integrated Algebra Regents question through the August 2009 exam, sorted by topic. Course Workbook for BOTH the New York State Integrated Algebra and the new Algebra I Common Core Regents Exams. Contains key terms and concepts, model problems, calculator instructions, practice problems, and Regents exam questions aligned to BOTH curricula. Includes every question appearing on the Integrated Algebra Regents through August 2013, organized by topic. Past NYS Regents exams to prepare high school students for the New York State Regents Exams in Integrated Algebra. Integrated Algebra Review Manual is a collection of 10 New York State Regents Exams that have been topically organized. Each exam has been dissected and organized in a manner that parallels the topics taught in the course. This type of organization is a more sensible way to study for the Integrated Algebra Regents Exam; it enables students to identify, target, and overcome weaknesses. Traditionally, students are scheduled to take Algebra I in their first year of high school mathematics in New York State. However, in many schools, the "top" students in a cohort have access to this course in eighth grade, tracking these high-achieving students ahead of their lower-achieving peers. In response, some schools have adopted the policy of "Algebra for all" in eighth grade—called universal acceleration. A perceived benefit to the policy of universal acceleration is ensuring equal access to a challenging curriculum for all students, regardless of race, socioeconomic status, or prior achievement—mitigating one of the perceived limitations of ability tracking. A drawback of an "acceleration for all" policy is that weaker students may not be developmentally ready to take Algebra in 8th grade, while at the same time, stronger students' progress might be hindered. The purpose of this descriptive, quantitative study is to investigate how the implementation of acceleration for all has impacted the timing of when students take the Integrated Algebra Regents in one school district, the district's achievement on the Integrated Algebra Regents and whether the policy affects subgroups of students differentially. The results from the study will be significant to school leaders, as districts may wish to consider these policy changes to enhance learning opportunities for all students. Reviews math topics including algebraic language, sets, and ratios; offers test-taking tips; provides practice questions and answers; and includes six actual Regents Exams with answers. When students have only six to eight weeks to review for the Regents exam and they have to remember so many topics, what can the teacher offer to help? They won't be able to review the 800 page textbooks or even the 400 page review books. Our students need an efficient review kit that is concise, yet contains all the important mathematical concepts and their applications. This book will help students remember all the key topics and build their problem solving skills through the use of examples. This review book is geared towards helping students succeed with high scores on the Regents exams. I have already used these review sheets with my own Regents classes and I have seen firsthand that their performance is significantly higher than the statewide average. Both teachers and students like these review sheets because they are practical. This book contains three courses in one: Integrated Algebra 1, Geometry, and Algebra 2/Trigonometry. It also serves as a handy reference guide for math teachers and college students. New York Review Series, Integrated Algebra Mathematics Review helps students succeed on the New York State Regents Examinations. Lessons for each Performance Indicator include fully worked-out examples, key concepts, vocabulary, and exercises that are similar to those on the tests. A section on How to Master the New York Examination gives students additional test-taking tips and suggestions to increase success. This study took place at Skaneateles High School in Skaneateles, New York in a grade 10 Integrated Math AB course with 52 students in 3 sections using the TI-84 Plus family graphing calculators and the TI-Navigator classroom learning system with a projector and interactive whiteboard. New York State is phasing in a new curriculum that integrates Algebra I and Geometry in Math A, and Algebra II and Trigonometry in Math B. The course in the study represents an integrated Math AB class for grade 10. In a typical day throughout the year, students use their graphing calculators to compute answers, to compare answers with other students (via the TI-Navigator system), to generate their own examples or make predictions, and to discuss problem solving strategy with other students. Weekly tests and quizzes are also administered via the graphing calculator. In each of the past three years, 100% of the students have passed the New York State Regents Math A. But closer examination of the percent of students scoring at or above 90% on the Regents Math AB test shows the dramatic impact of the TI-Navigator system: with the TI-Navigator system an impressive 27% more students scored in the 90% range in 2007--62% in 2007 vs. 35% in 2005 without the TI-Navigator system.
