Oxygen-deprived for two hours at birth, Christopher Nolan lived to write, at age twenty-one, the autobiography of his childhood, told as the story of Joseph Meehan. He wrote the book, using a "unicorn stick" attached to his head, letter by painful letter. The result is astonishingly lyrical, filled with powerful description, touching moments of triumph and humiliation, and, above all, disarming wit. It is, in the words of London's Daily Express, "a book of sheer wonder".

Literary Nonfiction. Ewa Hryniewicz-Yarbrough arrived in the United States from Poland in 1984, bringing memories of life under a totalitarian regime, where the personal was always political. In essay after essay in OBJECTS OF AFFECTION, her remarkable debut, Hryniewicz-Yarbrough shows the immigrant's double perspective, exploring a "bi-polar" world of displacement and rootlessness, geography and memory, individual and family history, always with an acute awareness of losses and gains that accompany adaptation to a new language and culture and the creation of a new identity.

Meanwhile, his most smart and considerate daughter Anne goes to Uppercross to look after a sick sister. Is the old-time love still alive in the hearts of Anne and Frederick? From Pulitzer Prize finalist Linda Hogan, *Solar Storms* tells the moving, "luminous" (Publishers Weekly) story of Angela Jenson, a troubled Native American girl coming of age in the foster system in Oklahoma, who decides to reunite with her family. At seventeen, Angela returns to the place where she was raised—a stunning island town that lies at the border of Canada and Minnesota—where she finds that an eager developer is planning a hydroelectric dam that will leave sacred land flooded and abandoned. Joining up with three other concerned residents, Angela fights the project, reconnecting with her ancestral roots as she does so. Harrowing, lyrical, and boldly incisive, *Solar Storms* is a powerful examination of the clashes between cultures and traumatic repercussions that have shaped American history.

A public school principal's account of the courageous leaders who have dismantled the tracking

systems in their schools in order to desegregate classrooms. What would happen if a school eliminated the “tracks” that rank students based on their perceived intellectual abilities? Would low-achieving students fall behind and become frustrated? Would their higher-achieving peers suffer from a “watered-down” curriculum? Or is tracking itself the problem? A growing body of research shows that tracking doesn’t increase learning for the minority and low-income students who are overrepresented in low-track classrooms. This de facto segregation has led many civil rights advocates to argue that tracking is turning back the clock on equal education. As a principal at a New York high school, Carol Corbett Burris believed that the curriculum for the best students was the best curriculum for all. She helped lead a bold plan to eliminate tracking from her school, and the results couldn’t have been further from the doom-and-gloom scenarios of tracking proponents. Instead, there was a dramatic improvement in the achievement of all students, across racial and socioeconomic divisions, and a near elimination of the achievement gap. Today, due to those efforts, International Baccalaureate English is the twelfth-grade curriculum for South Side students, and all students take the same challenging courses, together, to prepare them for college. In *On the Same Track*, Burris draws on her own experience, on the experiences of other schools, and on the latest research to make an impassioned case for detracking. Not only does the practice of tracking fail to benefit lower-tracked students, as Burris shows, but it also results in the resegregation of classrooms. Furthermore, she argues that many of today’s popular reforms emanate from the same “sort and select” mentality that reinforces social stratification based on race and class. *On the Same Track* is a rousing, controversial, and yet optimistic account of how we need to change our assumptions and policies if we are to live up to the promise of democratic public education. Only by holding all students to the same high standards can we ensure that all have the same opportunity to live up to their full potential. From the Hardcover edition. A fascinating book on the joys of discovering how the world works, by the Pulitzer Prize-winning author of *Cosmos* and *Shadows of Forgotten Ancestors*. “Magnificent . . . Delightful . . . A masterpiece. A message of tremendous hope for humanity . . . While ever conscious that human folly can terminate man’s march into the future, Sagan nonetheless paints for us a mind-boggling future: intelligent robots, the discovery of extraterrestrial life and its consequences, and above all the challenge and pursuit of the mystery of the universe.”—Chicago Tribune “Go out and buy this book, because Carl Sagan is not only one of the world’s most respected scientists, he’s a great writer. . . . I can give a book no greater accolade than to say I’m planning on reading it again. And again. And again.”—The Miami Herald “The brilliant astronomer . . . is persuasive, provocative and readable.”—United Press International “Closely reasoned, impeccably researched, gently humorous, utterly devastating.”—The Washington Post
