The Net Effect Feb 24 2021 2012 Honorable Mention from the Association of Internet Researchers for their Annual Best Book Prize Outstanding Academic Title from 2011 by Choice Magazine This book about America's romance with computer communication looks at the internet, not as harbinger of the future or the next big thing, but as an expression of the times. Streeter demonstrates that our ideas about what connected computers are for have been in constant flux since their invention. In the 1950s they were imagined as the means for fighting nuclear wars, in the 1960s as systems for bringing mathematical certainty to the messy complexity of social life, in the 1970s as countercultural playgrounds, in the 1980s as an icon for what's good about free markets, in the 1990s as a new frontier to be conquered and, by the late 1990s, as the transcendence of markets in an anarchist open source utopia. The Net Effect teases out how culture has influenced the construction of the internet and how the structure of the internet has played a role in cultures of social and political thought. It argues that the internet's real and imagined anarchic qualities are not a product of the technology alone, but of the historical peculiarities of how it emerged and was embraced. Finding several different traditions

at work in the development of the internet—most uniquely, romanticism—Streeter demonstrates how the creation of technology is shot through with profoundly cultural forces—with the deep weight of the remembered past, and the pressures of shared passions made articulate.

Three American Radicals Mar 16 2020 Sender Garlin is a veteran journalist and pamphleteer who has interviewed such figures as Theodore Dreiser, Clarence Darrow and Emma Goldman, and was present at all the Moscow purge trials of the 1930s. Here he writes on three Americans involved in forging a new political force before, and just after, the turn of the century.

Designing and Controlling the Outsourced Supply Chain Mar 28 2021 All organizations outsource. They differ only in the scope and extent of what they procure as goods and services from outside entities. These choices drive an organization's financial performance and long-term competitive viability, and establish the tenor of day-to-day operations. Outsourcing can solve many problems, but is also fraught with hidden costs and risks. This monograph examines outsourcing from a lifecycle perspective. This means tracing the full arc from the germination of the idea to outsource, to the assessment of options, to the installation of control mechanisms, to grappling with conflicts that inevitably arise over time, all the way to the sunset of the chosen strategy. The analysis is highly attentive to the details of operational execution, especially regarding how human resources participate in these decision processes and are impacted by the choices made.

Radar Instruction Manual May 18 2020 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. BlackwellAssistant Secretary for Maritime Affairs

Raspberry Pi LED Blueprints Oct 23 2020 Design, build, and test LED-based projects using the Raspberry Pi About This Book Implement real LED-based projects for Raspberry Pi Learn to interface various LED modules such as LEDs, 7-segment, 4-digits 7 segment, and dot matrix to Raspberry Pi Get hands-on experience by exploring real-time LEDs with this project-based book Who This Book Is For This book is for those who want to learn how to build Raspberry Pi projects utilising LEDs, 7 segment, 4-digits 7 segment, and dot matrix modules. You also will learn to implement those modules in real applications, including interfacing with wireless modules and the Android mobile app. However, you don't need to have any previous experience with the Raspberry Pi or Android platforms. What You Will Learn Control LEDs, 7 segments, and 4-digits 7 segment from a Raspberry Pi Expand Raspberry Pi's GPIO Build a countdown timer Build a digital clock display Display numbers and characters on dot matrix displays Build a traffic light controller Build a remote home light control with a Bluetooth low energy module and Android Build mobile Internet-controlled lamps with a wireless module and Android In Detail Blinking LED is a popular application when getting started in embedded development. By customizing and utilising LED-based modules into the Raspberry Pi board, exciting projects can be obtained. A countdown timer, a digital clock, a traffic light controller, and a remote light controller are a list of LED-based inspired project samples for Raspberry Pi. An LED is a simple actuator device that displays lighting and can be controlled easily from a Raspberry Pi. This book will provide you with the ability to control LEDs from Raspberry Pi, starting from describing an idea through designing and implementing several projects based on LEDs, such as, 7-segments, 4-digits 7 segment, and dot matrix displays. Beginning with step-by-step instructions on installation and configuration, this book can either be read from cover to cover or treated as an essential reference companion to your Raspberry Pi. Samples for the project application are provided such as a countdown timer, a

digital clock, a traffic light controller, a remote light controller, and an LED-based Internet of Things, so you get more practice in the art of Raspberry Pi development. Raspberry Pi LED Blueprints is an essential reference guide full of practical solutions to help you build LED-based applications. Style and approach This book follows a step-by-step approach to LED-based development for Raspberry Pi, explained in a conversational and easy-to-follow style. Each topic is explained sequentially in the process of building an application, and detailed explanations of the basic and advanced features are included.

Developmental Dysgraphia May 30 2021 The ability to communicate with written language is critical for success in school and in the workplace. Unfortunately, many children suffer from developmental dysgraphia—impairment in acquiring spelling or handwriting skills—and this form of impairment has received relatively little attention from researchers and educators. This volume brings together, for the first time, theoretically grounded and methodologically rigorous research on developmental dysgraphia, presented alongside reviews of the typical development of spelling and writing skills. Leading experts on writing and dysgraphia shed light on different types of impairments that can affect the learning of spelling and writing skills, and provide insights into the typical development of these skills. The volume, which contributes both to the basic science of literacy and to the applied science of diagnosing and treating developmental dysgraphia, should interest researchers, educators, and clinicians. This book was originally published as a special issue of Cognitive Neuropsychology.

The Last Days of the Kingdom of Israel Sep 21 2020 Despite considerable scholarly efforts for many years, the last two decades of the Kingdom of Israel are still beneath the veil of history. What was the status of the Kingdom after its annexation by Assyria in 732 BCE? Who conquered Samaria, the capital of the Kingdom? When did it happen? One of the primary reasons for this situation lies in the discrepancies found in the historical sources, namely the Hebrew Bible and the Assyrian texts. Since biblical studies and Assyriology are two distinct disciplines, the gaps in the sources are not easy to bridge. Moreover, recent great progress in the archaeological research in the Southern Levant provides now crucial new data, independent of these textual sources. This volume, a collection of papers by leading scholars from different fields of research, aims to bring together, for the first time, all the available data and to discuss these conundrums from various perspectives in order to reach a better and deeper understanding of this crucial period, which possibly triggered in the following decades the birth of "new Israel" in the Southern Kingdom of Judah, and eventually led to the formation of the Hebrew Bible and its underlying theology.
