Mac OS X: The Missing Manual, Tiger Edition is the authoritative book that's ideal for every user, including people coming to the Mac for the first time. Our guide offers an ideal introduction that demystifies the Dock, the unfamiliar Mac OS X folder structure, and the entirely new Mail application. There are also mini-manuals on iLife applications such as iMovie, iDVD, and iPhoto, those much-heralded digital media programs, and a tutorial for Safari, Mac's own web browser. And plenty more: learn to configure Mac OS X using the System Preferences application, keep your Mac secure with FileVault, and learn about Tiger's enhanced Firewall capabilities. If you're so inclined, this Missing Manual also offers an easy introduction to the Terminal application for issuing basic Unix commands. There's something new on practically every page, and David Pogue brings his celebrated wit and expertise to every one of them. Mac's brought a new cat to town and we have a great new way to tame it. This concern centres on environmental and health issues and inadvertent damage that can be done to off-target species. A national set of competencies has been developed for the use of chemicals. SMARTtrain is one of the training programs that delivers these competencies. The training program is offered at four levels: Australian Qualification Framework, AQF levels. This course is designed at AQF level 3 and people who successfully complete the course will receive two units of competency and be issued with a Statement of Attainment and a chemical users card. Level III Chemical Application courses are suited to people who are responsible for the purchase and application of pesticides without supervision. This includes owner-operators, local government and government employees and contractors. In-class learning activities are included that will assist the learner to gain knowledge and the ability to interpret labels and SDSs, apply, transport and store chemicals safely, and complete records to comply with legislation.
