Ten years ago, the United States stood at the forefront of the Internet revolution. With some of the fastest speeds and lowest prices in the world for high-speed Internet access, the nation was poised to be the global leader in the new knowledge-based economy. Today that global competitive advantage has all but vanished because of a series of government decisions and resulting monopolies that have allowed dozens of countries, including Japan and South Korea, to pass us in both speed and price of broadband. This steady slide backward not only deprives consumers of vital services needed in a competitive employment and business market—it also threatens the economic future of the nation. This important book by leading telecommunications policy expert Susan Crawford explores why Americans are now paying much more but getting much less when it comes to high-speed Internet access. Using the 2011 merger between Comcast and NBC Universal as a lens, Crawford examines how we have created the biggest monopoly since the breakup of Standard Oil a century ago. In the clearest terms, this book explores how telecommunications monopolies have affected the daily lives of consumers and America's global economic standing.

UNVEILING THE HIDDEN MYSTERY OF AMERICA'S ROLE IN BIBLE PROPHECY

The world is ever-changing. As we witness unrest, political upheaval, pandemics, and general uncertainty, we have to wonder, "What in the world is going on?" What seems like a continual roller coaster ride is disturbing, and people are looking for answers. You can stop looking because the answers can be found in the writings of the ancient prophets. In this new study guide, *The Hour That Changes Everything*, Richard

Pearson will take us through the Bible, highlighting God's plan for America's current and future role in the End Times. Something is indeed happening, and Richard Pearson digs deeply into the Bible to help you understand biblical prophecy from a refreshingly new perspective. With each chapter, you do not only learn more about prophecy, but you'll also clearly discover hidden mysteries pointing to the United States' role in it. IT WILL COME IN ONE HOUR While the Bible has plenty to say about the End Times, *The Hour That Changes Everything* will uncover the greatest "time sequence " in human history. In that one hour, an incredible cataclysmic change will cover the world pivoting around The USA. But at the same time, even as the hour brings judgment, Richard Pearson details how the God who delivered Shadrach, Meshach, and Abednego from Babylon's fiery furnace, will once again manifest His presence, in our generation, and miraculously open a door for our escape. Richard Pearson founded Richard Pearson Ministries while serving for twenty-one years on the executive board of Oral Roberts University. Retired now as CEO of several Canadian transportation companies, He and his wife, Karen, reside in Canada. It's no secret today's media landscape is evolving at a fast and furious pace – and students are experiencing these developments firsthand. While students are familiar with and may be using the latest products and newest formats, they may not understand how the media has evolved to this point or what all these changes mean. This is where *Media and Culture* steps in. The eighth edition pulls back the curtain and shows students how the media really works, giving students the deeper insight and

context they need to become informed media critics. In this updated edition of the industry staple, veteran media executive Jeff Ulin relates business theory and practice across key global market segments—film, television, and online/digital—providing you with an insider's perspective that can't be found anywhere else. Learn how an idea moves from concept to profit and how distribution dominates the bottom line: Hollywood stars may make the headlines, but marketing and distribution are the behind-the-scenes drivers converting content into cash. The third edition: Includes perspectives from key industry executives at studios, networks, agencies and online leaders, including Fox, Paramount, Lucasfilm, Endeavor, Tencent, MPAA, YouTube, Amazon, and many more; Explores the explosive growth of the Chinese market, including box office trends, participation in financing Hollywood feature films, and the surge in online usage; Illustrates how online streaming leaders like Netflix, Amazon, Apple, YouTube, Hulu and Facebook are changing the way TV content is distributed and consumed, and in cases how these services are moving into theatrical markets; Analyzes online influences and disruption throughout the distribution chain, and explains the risks and impact stemming from changing access points (e.g., stand-alone apps), delivery methods (over-the-top) and consumption patterns (e.g., binge watching); Breaks down historical film windows, the economic drivers behind them, and how online and digital delivery applications are changing the landscape. Ulin provides the virtual apprenticeship you need to demystify and manage the complicated media markets,

understand how digital distribution has impacted the ecosystem, and glimpse into the future of how film and television content will be financed, distributed and watched. An online eResource contains further discussion on topics presented in the book. This book, a first in its kind, offers a survey of the present state of affairs in media accessibility research and practice. It focuses on professional practices which are relative newcomers within the field of audiovisual translation and media studies, namely, audio description for the blind and visually impaired, sign language, and subtitling for the deaf and the hard-of-hearing for television, DVD, cinema, internet and live performances. Thanks to the work of lobbying groups and the introduction of legislation in some countries, media accessibility is an area that has recently gained marked visibility in our society. It has begun to appear in university curricula across Europe, and is the topic of numerous specialised conferences. The target readership of this book is first and foremost the growing number of academics involved in audiovisual translation at universities ? researchers, teachers and students ? but it is also of interest to the ever-expanding pool of practitioners and translators, who may wish to improve their crafts. The collection also addresses media scholars, members of deaf and blind associations, TV channels, and cinema or theatre managements who have embarked on the task of making their programmes and venues accessible to the visually and hearing impaired.

*in the American news media, from the first colonial newspaper to the Internet age. By the co-author of Harvest of Empire. The Internet didn't kill TV! It has become its best friend. Americans are watching more television than ever before, and we're engaging online at the same time we're tuning in. Social media has created a new and powerful "backchannel", fueling the renaissance of live broadcasts. Mobile and tablet devices allow us to watch and experience television whenever and wherever we want. And "connected TVs" blend web and television content into a unified big screen experience bringing us back into our living rooms. Social TV examines the changing (and complex) television landscape and helps brands navigate its many emerging and exciting marketing and advertising opportunities. Social TV topics include: Leveraging the "second screen" to drive synched and deeper brand engagement Using social ratings analytics tools to find and target lean-forward audiences Aligning brand messaging to content as it travels time-shifted across devices Determining the best strategy to approach marketing via connected TVs Employing addressable TV advertising to maximize content relevancy Testing and learning from the most cutting-edge emerging TV innovations The rise of one technology doesn't always mean the end of another. Discover how this convergence has created new marketing opportunities for your brand. We live in a boosterish era that exhorts us to play local and buy local. But what does it mean to support local media? How should we define local media in the first place? Christopher Ali delves into our ideas about localism and their far-reaching repercussions for the discourse of*

federal media policy and regulation. His critique focuses on the new interest in localism among regulators in the United States, the United Kingdom, and Canada. As he shows, the many different and often contradictory meanings of localism complicate efforts to study local voices. At the same time, market factors and regulators' unwillingness to critically examine local media blunt challenges to the status quo. Ali argues that reconciling the places where we live with the spaces we inhabit will point regulators toward effective policies that strengthens local media. That new approach will again elevate local media to its rightful place as a vital part of the public good.

*Analyzing the strategic maneuvers of today's great information powers—Apple, Google, and an eerily resurgent AT&T—Tim Wu uncovers a time-honored pattern in which invention begets industry and industry begets empire. It is easy to forget that every development in the history of the American information industry—from the telephone to radio to film—once existed in an open and chaotic marketplace inhabited by entrepreneurs and utopians, just as the Internet does today. Each of these, however, grew to be dominated by a monopolist or cartel. In this pathbreaking book, Tim Wu asks: will the Internet follow the same fate? Could the Web—the entire flow of American information—come to be ruled by a corporate leviathan in possession of "the master switch"? Here, Tim Wu shows how a battle royale for the Internet's future is brewing, and this is one war we dare not tune out. The transportation of multimedia over the network requires timely and errorless transmission much more strictly than other data. This had led to special protocols and to special treatment in multimedia applications (telephony, IP-TV, streaming) to overcome network issues. This book begins with an overview of the vast market combined with the user's expectations. The base mechanisms of the audio/video coding (H.26x etc.) are explained to understand characteristics of the generated network traffic. Further chapters treat common specialized underlying IP network functions which cope with multimedia data in*

conjunction which special time adaption measures. Based on those standard functions these chapters can treat uniformly SIP, H.248, High-End IP-TV, Webcast, Signage etc. A special section is devoted to home networks which challenge high-end service delivery due to possibly unreliable management. The whole book treats concepts described in accessible IP-based standards and which are implemented broadly. The book is aimed at graduate students/practitioners with good basic knowledge in computer networking. It provides the reader with all concepts of currently used IP technologies of how to deliver multimedia efficiently to the end user. #1 New York Times bestselling author Dr. Daniel Amen reveals the seven neuroscience secrets to becoming more than 30 percent happier in just 30 days—regardless of your age, upbringing, genetics, or current situation. **MASTERPIECE!** "A double puzzle for puzzle fans, who don't often get the classicism they want from contemporary thrillers." —Janet Maslin, *The New York Times* New York Times bestseller | Winner of the Macavity Award for Best Novel | #1 Indie Next Pick | NPR best book of the Year | Washington Post best book of the Year | Esquire best book of the Year

From the New York Times bestselling author of *Moriarty* and *Trigger Mortis*, this fiendishly brilliant, riveting thriller weaves a classic whodunit worthy of Agatha Christie into a chilling, ingeniously original modern-day mystery. When editor Susan Ryeland is given the manuscript of Alan Conway's latest novel, she has no reason to think it will be much different from any of his others. After working with the bestselling crime writer for years, she's intimately familiar with his detective, Atticus Pünd, who solves mysteries disturbing sleepy English villages. An homage to queens of classic British crime such as Agatha Christie and Dorothy Sayers, Alan's traditional formula has proved hugely successful. So successful that Susan must continue to put up with his troubling behavior if she wants to keep her job. Conway's latest tale has Atticus Pünd investigating a murder at Pye Hall, a local manor house. Yes, there are dead bodies and a host

of intriguing suspects, but the more Susan reads, the more she's convinced that there is another story hidden in the pages of the manuscript: one of real-life jealousy, greed, ruthless ambition, and murder. Masterful, clever, and relentlessly suspenseful, *Magpie Murders* is a deviously dark take on vintage English crime fiction in which the reader becomes the detective. Kids will love to learn their letters with these adorable alphabetical creations. From Alligator to Zebra, each Alphabetimal features an animal in the shape of a letter, cheerfully posed in a ready-to-color habitat. Plus, all the letters are repeated at the end of the book, displaying the alphabet in its entirety.
