Set in the bucolic town of Angie, Louisiana, *The Lord's Acre* tells the story of Eli Woodbine, a young boy who watches helplessly as his fundamentalist parents give in to their increasing sense of desperation and paranoia, living in a world where they can no longer see any hope or reason for existing. When the family is at their absolute lowest, they come across a local, charismatic church leader, in whom they quickly place all of their faith. Yet this man—known to them only as “Father”—is unlike anyone they have ever encountered before. But one day, and with no explanation save for a mysterious gift given to Eli, Father disappears, leaving everything behind him in ruin. Eli and his parents attempt to pick up the pieces, however, as they try to find answers to their new predicament. But their efforts go awry when Eli breaks into an abandoned grocery store one night in order to steal food for his family. He is arrested and taken to jail, where, to his surprise, he is finally able to discover the hope he had always been so desperate to find. The Bec Hellouin model for growing food, sequestering carbon, creating jobs, and increasing biodiversity without using fossil fuels. When Charles and Perrine Hervé-Gruyer set out to create their farm in an historic Normandy village, they had no idea just how much their lives would change. Neither one had ever farmed before. Charles had been circumnavigating the globe by sail, operating a floating school that taught students about ecology and indigenous cultures. Perrine had been an international lawyer in Japan. Each had returned to France to start a new life. Eventually, Perrine joined Charles in Normandy, and *Le Ferme du Bec Hellouin* was born. Bec Hellouin has since become a celebrated model of innovative, ecological agriculture in Europe, connected to national and international organizations addressing food security, heralded by celebrity chefs as well as the Slow Food movement, and featured in the inspiring César and COLCOA award-winning documentary film, *Demain* ("Tomorrow"). *Miraculous Abundance* is the eloquent tale of the couple's evolution from creating a farm to sustain their family to delving into an experiment in how

to grow the most food possible, in the most ecological way possible, and create a farm model that can carry us into a post-carbon future—when oil is no longer moving goods and services, energy is scarcer, and localization is a must. Today, the farm produces a variety of vegetables using a mix of permaculture, bio-intensive, four-season, and natural farming techniques—as well as techniques gleaned from native cultures around the world. It has some animals for eggs and milk, horses for farming, a welcome center, a farm store, a permaculture school, a bread oven for artisan breads, greenhouses, a cidery, and a forge. It has also become the site of research focusing on how small organic farms like theirs might confront Europe’s (and the world’s) projected food crisis. But in this honest and engaging account of the trials and joys of their uncompromising effort, readers meet two people who are farming the future as much as they are farming their land. They envision farms like theirs someday being the hub for a host of other businesses that can drive rural communities—from bread makers and grain millers to animal care givers and other tradespeople. Market farmers and home gardeners alike will find much in these pages, but so will those who’ve never picked up a hoe. The couple’s account of their quest to design an almost Edenlike farm, hone their practices, and find new ways to feed the world is an inspiring tale. It is also a love letter to a future in which people increasingly live in rural communities that rely on traditional skills, locally created and purveyed goods and services, renewable energy, and greater local governance, but are also connected to the larger world. A passport to freedom that shows how to find fun, food, shelter, and income on land that may be within easy-driving distance of the city and suburbs. Why work a lifetime, asks Angier, to accumulate enough money to retire from the rat race during the last, least active years of life, when a little ground can provide healthful, relaxed living—now—and income too? *One Acre and Security* explains how “three-squares-a-day” and money to spend can come from the earth with instructions on: sheep or pig farming, raising bees for honey, keeping dairy herds of cows or goats, making money with herb culture, raising and selling rabbits and earthworms, running a poultry farm, raising fish, frogs, and turtles for profit and fun. Angier, the man who has done it all himself, shares too what he has learned about some of the ways to eat from nature’s free banquet table, how to stretch country-living with hikes on famous trails or on any untrammelled path, where to find the best hunting and fishing, and how to catch bigger, healthier fish. “This book is written for those who want to move—not to the distant wilderness—but just far enough away from the smog and the screaming traffic to be where meat will be theirs for the raising, fish for the catching, fruit and vegetables for the picking, fuel for the cutting, home for the satisfaction of building...breathing cleaner air, beholden to none, doing what they want to do most and giving it their best,” says Bradford Angier in *One Acre and Security*... Gone are the days when butchering was only trusted to someone at the local supermarket. Today, butchering has come full circle and is once again appreciated for the great craft that it is. Small butcher shops are popping up everywhere, and people have realized that by handling butchering at home, they can not only save money, but have greater control over the quality of the meat they consume, how they cut, utilize, and preserve it, and from where it is sourced. *The Home Butchering Handbook* is a hands-on, how-to guide for anyone who understands the benefits of and appreciates this craft, and wishes to fine-tune their knife skills and develop the knowledge necessary to handle all of the most common cuts. Readers will learn from a professional craft butcher how to prepare their kitchen for butchering, what tools they need, how to prepare and store all of the most common cuts, and most importantly what not to do when attempting to butcher at home. One of NPR’s “Books We Love” New York Times Book Review’s “The Best True Crime of 2022” “Rich in historical perspective and graced by novelistic touches, grips the reader from first to last.”—Wall Street Journal A suspense filled tale of murder on the American frontier—shedding new light on a family of serial killers in Kansas, whose horrifying crimes gripped the attention of a nation still reeling from war. In 1873 the people of Labette County, Kansas made a grisly discovery. Buried by a trailside cabin beneath an orchard of young apple trees were the remains of countless bodies. Below the cabin itself was a cellar stained with blood. The Benders, the family of four who once resided on the property were nowhere to be found. The discovery sent the local community and national newspapers into a frenzy that continued for decades,

sparking an epic manhunt for the Benders. The idea that a family of seemingly respectable homesteaders—one among the thousands relocating farther west in search of land and opportunity after the Civil War—were capable of operating "a human slaughter pen" appalled and fascinated the nation. But who the Benders really were, why they committed such a vicious killing spree and whether justice ever caught up to them is a mystery that remains unsolved to this day. Set against the backdrop of postbellum America, *Hell's Half-Acre* explores the environment capable of allowing such horrors to take place. Drawing on extensive original archival material, Susan Jonusas introduces us to a fascinating cast of characters, many of whom have been previously missing from the story. Among them are the families of the victims, the hapless detectives who lost the trail, and the fugitives that helped the murderers escape. *Hell's Half-Acre* is a journey into the turbulent heart of nineteenth century America, a place where modernity stalks across the landscape, violently displacing existing populations and building new ones. It is a world where folklore can quickly become fact and an entire family of criminals can slip through a community's fingers, only to reappear in the most unexpected of places.

Acres of Diamonds Russell H. Conwell - In "Acres of Diamonds," Russell Conwell shows success is a spiritual idea--the result of spiritual principles. Though not a "get rich guide," Conwell's book shows how to find a fortune-if you know where to look. There are as many opportunities for success today as in Conwell's time, if not more so, because they are found first and foremost in one's own conscience. Through his ministry and philosophy that "all good things are possible," Conwell opened the doors of opportunity for untold millions. "Acres of Diamonds" echoes his core belief-that each of us is placed here on earth for the primary purpose of helping others. Conwell was a minister, the founder of Temple University, and two hospitals where no one was ever turned away for lack of money. He was also a famous lecturer. In his lecture, the story is told of a man who sells his farm to travel far and wide in search of diamonds. There is a moral to the story in "Acres of Diamonds," a story which Conwell presented as a lecture more than 6,000 and to untold numbers of people. This is a small book with a large message that could potentially have an enormous impact on the reader with the 'ears to hear' it and the will to internalize it and put it into action in his or her life every day. The greatness that exists within every one of us does not exist in any external form whatsoever. Rather, it exists within us...waiting to be uncovered and unleashed. When used for the good of others and not for reasons of selfish gain, we discover that we, also, have more than we need; of contentment, of happiness and, yes, of wealth also. As we like to say in my household, "Change your mind, change your life." During the 1870s and '80s, a single bar-filled block in San Francisco called the Devil's Acre threw what may have been the most enduring party the world has ever seen. Duggan McDonnell is in love with the city of his forefathers and its ever-flowing cocktails, and it shows in this history-packed drinking tour through one of the most beloved cities in the world. Twenty-five iconic cocktail recipes made famous by the City by the Bay—from the legendary Pisco Punch, Mai Tai, and Irish Coffee to the Gold Rush-era Sazerac and more modern-day Lemon Drop—are accompanied by an additional 45 recipes that show the evolution of these classic elixirs, resulting in such contemporary favorites as the Revolver and the Last Word, guaranteeing to keep the party going and the liquor flowing. "Jeremy Gavron's new novel invites you on a remarkable walking tour - a tour during which the ghosts of London's Brick Lane open up their front doors." "Each house has a story to tell. At number 30, in the autumn of 1888, a man is arrested with a packet of entrails in his pocket and Inspector Abberline wonders if he has caught the Whitechapel murderer. Where number 111 now stands a medieval apprentice and a young nun are caught meeting at a spring. At 98, in 1904, the People's Revolution gets underway." "As we journey down the street, these lives begin to echo each other across time. At number 41 a man tries to hide his family in the shadows of a ruined London; 1500 years later, a gangster's sister lives with the consequences of having been found. At 246 a mammoth dies, and long afterwards, a giant's thighbone is discovered. Beneath it all, a young woman trawls through the sewers, finding the things the rest of us have lost or forgotten. From within these individual stories, we hear the echoes of history." "In a blend of fiction, history and archaeology, Jeremy Gavron uncovers the story of one street - the story of Brick Lane, the story of London, and the story of Britain."--BOOK JACKET.

SPIN-Farming Basics outlines how to make money growing common vegetables in backyards, front lawns, neighborhood lots or as part of larger acreages in the country. SPIN stands for small plot intensive, and SPIN-Farming Basics provides everything you'd expect from a good franchise: a business concept, marketing advice, financial benchmarks and a detailed day-to-day workflow. It is non-technical, easy-to-understand and inexpensive-to-implement and shows readers how to farm commercially wherever they live, as long as there are nearby markets to support them.

Adventures on the road to real-world self-sufficiency Many of us want to increase our self-sufficiency, but few have access to the ideal 5 sunny, gently-sloping acres of rich, loamy, well-drained soil. Jenni Blackmore presents a highly entertaining, personal account of how permaculture can be practiced in adverse conditions, allowing anyone to learn to live more sustainably in a less-than-perfect world. With a rallying cry of "If we can do it, you can too," she distills the wisdom of 20 years of trial and error into a valuable teaching tool. The perfect antidote to dense, high-level technical manuals, *Permaculture for the Rest of Us* presents the fundamental principles of this sometimes confusing concept in a humorous, reader-friendly way. Each chapter focuses on a specific method or technique, interspersing straightforward explanations with the author's own experiences. Learn how to successfully retrofit even the smallest homestead using skills such as: No-till vs. till gardening, composting and soil-building Natural pest control and integrating small livestock Basic greenhouse construction Harvesting, preservation and more. Ideal for urban dreamers, suburbanites and country-dwellers alike, this inspirational and instructional "encouragement manual" is packed with vibrant photographs documenting the author's journey from adversity to abundance. Turn your farm into a cash cow! Ron Macher offers a host of simple strategies for increasing your farm earnings, from purchasing durable equipment to growing economically viable crops. A seasoned expert in farm efficiency, Macher shows you how to locate a lucrative niche market for your products, optimize sales, and minimize costs. Whether you're buying a new farm or jump-starting an old one, Macher's savvy tips will help you turn your enterprise into a profitable business. This book will give you everything you need to set up your own mini-farm, allowing you to live more self-sufficiently. PULITZER PRIZE WINNER • NATIONAL BESTSELLER • A "powerful and poignant" twentieth-century reimagining of Shakespeare's *King Lear* (The New York Times Book Review) that takes on themes of truth, justice, love, and pride—and centers on a wealthy Iowa farmer who decides to divide his farm between his three daughters. When the youngest daughter objects, she is cut out of his will. This sets off a chain of events that brings dark truths to light and explodes long-suppressed emotions. Ambitiously conceived and stunningly written, *A Thousand Acres* reveals the beautiful yet treacherous topography of humanity. "A family portrait that is also a near-epic investigation into the broad landscape, the thousand dark acres of the human heart.... The book has all the stark brutality of a Shakespearean tragedy." —The Washington Post Book World In the Depression-era Deep South, a destitute farmer struggles to raise a family on his own: The bestselling classic by the author of *Tobacco Road*. Single father and poor Southern farmer Ty Ty Walden has a plan to save his farm and his family: He will tear his fields apart until he finds gold. While Ty Ty obsesses over his fool's quest, his sons and daughters search in vain for their own dreams of instant happiness—whether from money, violence, or sex. *God's Little Acre* is a classic dark comedy, a satire that lampoons a broken South while holding a light to the toll that poverty takes on the hopes and dreams of the poor themselves. This ebook features an illustrated biography of Erskine Caldwell including rare photos and never-before-seen documents courtesy of the Dartmouth College Library. Using crop revenue as the basis for agricultural payments has long been proposed as a way to reform U.S. farm programs. Revenue is more closely related to farm income than either prices or yields individually. The ACRE program uses a combination of State- and farm-level revenue guarantees that are determined from recent historic prices and yields. This report examines and simulates crop revenue variability for producers of four crops – corn, soybeans, wheat, and cotton – and estimates potential ACRE payments from a broad range of possible revenue outcomes. It analyzes how ACRE payments and their effect on farm-level revenue variability would be distributed across crops and production regions. Illus. This is a print on demand report. "Provides an accessible yet detailed story

of how telescopes are made, the science behind their function, and their promise for future astronomical discoveries." -- Science News

Mini farming describes a holistic approach to small-area farming that will show you how to produce 85 percent of an average family's food on just a quarter acre—and earn \$10,000 in cash annually while spending less than half the time that an ordinary job would require. Now expanding exponentially on his bestselling *Mini Farming: Self-Sufficiency on ¼ Acre*, Brett Markham gives you tips, tricks, and planning advice on how to make the most of your mini farm. New topics include: -Soil and Fertility Tools and Techniques -Planting Guides and Seeders -Easy Trellising -Weed Control Techniques -Greater Food Self-Sufficiency -Making Your Own Country Wines -Making Your Own Vinegars -Making Cheese at Home -Cooking for Self-Sufficiency

Keep your costs down and production high with this complete guide to maximizing your mini farm—whether it's a rooftop urban garden, a suburban backyard, or a more substantial plot of land. Materials, tools, and techniques are detailed with tables, diagrams, and 200 color illustrations and author photographs. Instant #1 bestseller! The epic conclusion to the #1 bestselling *Miss Peregrine's Peculiar Children* series by Ransom Riggs. Jacob and his friends will face deadly enemies and race through history's most dangerous loops in this thrilling page-turner. The *Desolations of Devil's Acre* is the newest installment, and final adventure, in the beloved *Miss Peregrine's Peculiar Children* series. The last thing Jacob Portman saw before the world went dark was a terrible, familiar face. Suddenly, he and Noor are back in the place where everything began—his grandfather's house. Jacob doesn't know how they escaped from V's loop to find themselves in Florida. But he does know one thing for certain: Caul has returned. After a narrow getaway from a blood-thirsty hollow, Jacob and Noor reunite with Miss Peregrine and the peculiar children in *Devil's Acre*. The Acre is being plagued by desolations—weather fronts of ash and blood and bone—a terrible portent of Caul's amassing army. Risen from the Library of Souls and more powerful than ever, Caul and his apocalyptic agenda seem unstoppable. Only one hope remains—deliver Noor to the meeting place of the seven prophesied ones. If they can decipher its secret location.

The classic USDA handbook to self-reliant living, now completely revised and updated. *Mini Farming* describes a holistic approach to small-area farming that will show you how to produce 85 percent of an average family's food on just a quarter acre—and earn \$10,000 in cash annually while spending less than half the time that an ordinary job would require. Even if you have never been a farmer or a gardener, this book covers everything you need to know to get started: buying and saving seeds, starting seedlings, establishing raised beds, soil fertility practices, composting, dealing with pest and disease problems, crop rotation, farm planning, and much more. Because self-sufficiency is the objective, subjects such as raising backyard chickens and home canning are also covered along with numerous methods for keeping costs down and production high. Materials, tools, and techniques are detailed with photographs, tables, diagrams, and illustrations. A legend is born.

The epic prequel to the *Last Templar Mysteries* series. *The Holy Land, 1291*. War has raged here for decades. The Crusader forces have been pushed back again and again until just one city remains in their control. One city that stands between the past and the future. One city that must be defended at all costs: Acre. Into this battle comes a young boy. Green and scared, he has never seen combat before. But, fleeing a dark past, he has no choice but to stay. That boy is Baldwin de Furnshill who, one day, will become the Last Templar. This is the story of the siege of Acre, and of the moment Baldwin first charged into battle. This is just the beginning. The rest is history.

The epic prequel to the bestselling *Last Templar Mysteries* series, perfect for fans of Christian Cameron and Ben Kane. Praise for Michael Jecks 'Marvellously portrayed' C. J. Sansom 'Michael Jecks is the master of the medieval whodunnit' Robert Low 'The most wickedly plotted medieval mystery novels' *The Times*

For urban and country dwellers alike, a quarter acre is all the space you need to farm all the food you need! Homesteading allows you to feed your family healthy meals harvested right from your own backyard while also reducing your environmental footprint. Live off the land you have. Plant a successful and sustainable farm—on a quarter acre to a full acre and beyond—where you can raise your own fruits, vegetables, chickens, bees, milk-bearing animals, and more. Local, organic food is attainable to you at a fraction of the cost with your own self-contained operation. Angela England runs her family's

successful, small-scale farm, and she teaches you how you can do the same. *Backyard Farming on an Acre (More or Less)* guides you through the essentials of planning a small farm—decide what should be grown or raised, and implement proven and sustainable homesteading techniques. Learn everything you need to know to maximize your space, yield, and harvest. It's not glamorous, but it is rewarding, so prepare to get a little dirt under your fingernails and see what kind of gardening and farming magic you—and your land!—are capable of. There are twenty million acres of lawns in North America. In their current form, these unproductive expanses of grass represent a significant financial and environmental cost. However, viewed through a different lens, they can also be seen as a tremendous source of opportunity. Access to land is a major barrier for many people who want to enter the agricultural sector, and urban and suburban yards have huge potential for would-be farmers wanting to become part of this growing movement. *The Urban Farmer* is a comprehensive, hands-on, practical manual to help you learn the techniques and business strategies you need to make a good living growing high-yield, high-value crops right in your own backyard (or someone else's). Major benefits include: Low capital investment and overhead costs Reduced need for expensive infrastructure Easy access to markets Growing food in the city means that fresh crops may travel only a few blocks from field to table, making this innovative approach the next logical step in the local food movement. Based on a scalable, easily reproduced business model, *The Urban Farmer* is your complete guide to minimizing risk and maximizing profit by using intensive production in small leased or borrowed spaces. Curtis Stone is the owner/operator of Green City Acres, a commercial urban farm growing vegetables for farmers markets, restaurants, and retail outlets. During his slower months, Curtis works as a public speaker, teacher, and consultant, sharing his story to inspire a new generation of farmers. *Mini Farming* describes a holistic approach to small-area farming that will show you how to produce 85 percent of an average family's food on just a quarter acre—and earn \$10,000 in cash annually while spending less than half the time that an ordinary job would require. Now expanding exponentially on his bestselling *Mini Farming: Self-Sufficiency on ¼ Acre*, Brett Markham gives you tips, tricks, and planning advice on how to make the most of your mini farm. New topics include: -Soil and Fertility Tools and Techniques -Planting Guides and Seeders -Easy Trellising -Weed Control Techniques -Greater Food Self-Sufficiency -Making Your Own Country Wines -Making Your Own Vinegars -Making Cheese at Home -Cooking for Self-Sufficiency Keep your costs down and production high with this complete guide to maximizing your mini farm—whether it's a rooftop urban garden, a suburban backyard, or a more substantial plot of land. Materials, tools, and techniques are detailed with tables, diagrams, and 200 color illustrations and author photographs. This entertaining and educational title helps familiarize young readers with land and sea measurements. From acres, to hectares, to nautical miles, the easy-to-read book offers engaging pictures and simple sentences to illustrate each type of measurement fully. In no time, young readers will be able to use each measurement system for themselves. Fun facts and a quick quiz give young readers additional reading and learning. Aligned to Common Core Standards and correlated to state standards. Sandcastle is an imprint of Abdo Publishing, a division of ABDO. Lloyd Kahn and Lesley's story of building their own home, establishing a garden, and practicing crafts on a small piece of land on the Northern California Coast, with over 500 photos. Thomas Philipp's study of Acre combines the most extensive use to date of local Arabic sources with commercial records in Europe to shed light on a region and power center many identify as the beginning of modern Palestinian history. The third largest city in eighteenth-century Syria—after Aleppo and Damascus—Acre was the capital of a politically and economically unique region on the Mediterranean coast that included what is today northern Israel and southern Lebanon. In the eighteenth century, Acre grew dramatically from a small fishing village to a fortified city of some 25,000 inhabitants. Cash crops (first cotton, then grain) made Acre the center of trade and political power and linked it inextricably to the world economy. Acre was markedly different from other cities in the region: its urban society consisted almost exclusively of immigrants seeking their fortune. The rise and fall of Acre in the eighteenth and nineteenth centuries, Thomas Philipp argues, must be seen against the background of the decay of central power in the Ottoman empire. Destabilization of imperial

authority allowed for the resurfacing of long-submerged traditional power centers and the integration of Arab regions into European and world economies. This larger imperial context proves the key to addressing many questions about the local history of Acre and its peripheries. How were the new sources of wealth and patterns of commerce that remade Acre reconciled with traditional forms of political power and social organization? Were these forms really traditional? Or did entirely new classes develop under the circumstances of an immigrant society and new commercial needs? And why did Acre, after such propitious beginnings as a center of export trade and political and military power strong enough to defy Napoleon, give way to the dazzling rise of Beirut in the nineteenth century? For centuries the object of the Crusader's fury and the trader's envy, Acre is here restored to its full significance at a crucial moment in Middle Eastern history. As food prices continue to rise, more and more people have discovered that they can create their own food supply, right on their own property, and at a fraction of the price of conventional farm food that's been shipped to their local grocery from locations unknown. By raising and harvesting their own fruits, vegetables, chickens, bees, milk-bearing animals, and more, people are growing locally, sustainably, and at a fraction of the cost. However, poor planning for needs, proper use of available space, and a lack of preparedness for preserving or selling the harvest can quickly lead to wasted time and sweat. Backyard Farming on an Acre (More or Less) is written by people who have planned and run a successful small-scale backyard farm. The authors guide readers through the essentials of planning a small-scale farm from a 1/4 acre all the way up to an acre and beyond. Readers will learn how to decide how large (or small) their farm should be, what they should plant or raise based on their individual wants and needs (and available space), and how they can prevent their efforts from being wasted. Proven, sustainable techniques will be presented to readers so they can yield the maximum benefit of their harvest through proven best practices. Readers will also learn how to raise small animals such as chickens and goats for milk, eggs, and meat, and will learn the critical practices for successfully parenting bees, growing fruit trees, and much more. Presents three humorous adventures on McBroom's wonderful one-acre prairie farm PEOPLE who think they "would like to have a little farm" naturally fall into two groups; those who are sure to fail and those likely to succeed. This book is written to help both! Its presentation of advantages and disadvantages, essential farming principles and practices should enable you to decide in which class you belong and whether or not you would be foolish or wise to risk making the plunge. In either case it should be worth many times its price because, on the one hand it should prevent fore-doomed failure, and on the other, show you how to avoid delay, disappointment, perhaps disaster, but attain the satisfaction that characterizes personal and well directed efforts in farming. (From the Introduction) This classic bestseller became that way because of its very practical and honest appraisal of how a person can get from crowded, noisy, dangerous city life to a peaceful, calm, satisfaction-filled lifestyle in a rural or even suburban setting. Get Your Copy Today! A former journalist describes her passion for gardening and her efforts to transform the land surrounding a historic house in a pre-Revolutionary Connecticut village into her own private Eden. Includes material on Luke Short, Bat Masterson, Wyatt Earp, Doc Holliday, Sam Bass, and Butch Cassidy.
