This book explores the leading role played by nursing science in the European Nordic countries. Recognized leaders in nursing research from Denmark, Finland, Iceland, Norway and Sweden, reflect on the leadership of nurses, the societal developments and the state of nursing science in their country, and the successes and remaining challenges nurses are facing. The book highlights representative leadership projects focusing on e.g. evidenced-based clinical practice, education and research that have impacted patient and healthcare outcomes in each country. The book shows how nursing, as a scientific discipline, has been developing rapidly in these five Nordic countries. They have more nurses per capita than other countries (OECD 2016) and healthcare is provided to all citizens. Moreover, nursing qualification in the Nordic countries was based on university education early on, and there are more professors of nursing than in other countries. Accordingly, this book on Leadership in nursing within the Nordic countries shares essential and pioneering expertise that will benefit nurses and nurse scientists around the globe. Leading clinical and experimental investigators comprehensively review the chemistry, biochemistry, molecular biology, physiology, and pathophysiology of nitric oxide in the cardiovascular systems. The Symposium on Vertical Reference Systems (VeReS) was initiated on the occasion of the XXII General Assembly of the International Union of Geodesy and Geophysics (IUGG), Birmingham 1999, by Professor Dr. Wolfgang Torge, Past President of the International Association of Geodesy (IAG) and representative of IAG to the Pan-American Institute of Geography and History (PAIGH). The idea was to organise another joint symposium of IAG and PAIGH like the previous one held during the XX IUGG General Assembly at Vienna, Austria, in 1991. Good reasons for such a joint symposium were the great success and the ongoing activities of the Project on the South American Geocentric Reference System (Sistema de Referencia Geocentrico para America del Sur, SIRGAS) being sponsored by IAG and PAIGH since 1993. The SIR GAS Project (Working Group I) had presented a continental South American reference frame of 58 stations during the IAG Scientific Assembly at Rio de Janeiro, in 1997. This reference frame was already adopted by several South American countries as the basis for their new national horizontal geodetic datums (SIRGAS Working Group II). To overcome the problems of the heterogeneous vertical (height) datums between the individual countries, SIRGAS had installed its Working Group III "Vertical Datum" in 1997. As the discussion on the unification of vertical reference systems is also going on in IAG and other bodies of science and practice, it was decided to dedicate the symposium to this topic.
