The Noble Ape Simulation was originally developed in 1996 as a biological and cognitive simulation. It was very basic and showed a graphical representation of an island populated with Noble Apes through a simple contour map. The initial development was done in Australia and Malaysia. The early development had considerable documentation. The documentation gave it a weight of interest, the software alone did not have. This is that documentation. (Book). Language standardization is an ongoing process based on the notions of linguistic correctness and models. This manual contains thirty-six chapters that deal with the theories of linguistic norms and give a comprehensive up-to-date description and analysis of the standardization processes in the Romance languages. The first section presents the essential approaches to the concept of linguistic norm ranging from antiquity to the present, and includes individual chapters on the notion of linguistic norms and correctness in classical grammar and rhetoric, in the Prague School, in the linguistic theory of Eugenio Coseriu, in sociolinguistics as well as in pragmatics, cognitive and discourse linguistics. The second section focuses on the application of these notions with respect to the Romance languages. It examines in detail the normative grammar and the normative dictionary as the reference tools for language codification and modernization of those languages that have a long and well-established written tradition, i.e. Romanian, Italian, French, Catalan, Spanish, and Portuguese. Furthermore, the volume offers a discussion of the key issues regarding the standardization of the 'minor' Romance languages as well as Creoles. The Coach's Mind Manual combines the latest findings from neuroscience, psychology, and mindfulness research to provide an accessible framework to help coaches and leadership development specialists improve their awareness of the mind, enhancing their coaching practice. Syed Azmatullah explains how such knowledge can be used to guide clients on a journey of self-discovery, facilitating transformational changes and enriching their performance and personal lives. Part One considers the mind's management committee, the cerebral cortex, and how its contrasting functions can be accessed to improve problem solving skills. Part Two considers the mind's middle management, the limbic system, balancing executive direction with our social and emotional needs, driving motivation around core values. Part Three examines how the environment, via the body, influences our mental infrastructure at various stages in life, guiding the selection of interventions. Part Four looks at interpersonal dynamics and how to maximise team performance. Part Five considers the power of collaboration for generating the culture needed to improve the sustainability of our global community. Each section contains self-reflection exercises and experiential role-play to help clients derive benefit from their new personal insights. Coaches are encouraged to combine the broad range of concepts presented with their own experience, creating a contextually-driven coaching process. By focusing on the mind as the target for coaching interventions Azmatullah establishes a comprehensive framework for achieving transformational change. The Coach's Mind Manual is ideal for all professionals engaged in adult development including executive coaches, business coaches, human resource development professionals, leadership development professionals, management consultants and organisational development professionals. INTRODUCTION Today's operational environment presents threats the Army has not faced in nearly 20 years. Against peer competitors, the joint force may face air parity or even localized enemy air overmatch, challenging the assumption of air superiority the joint force has held since the Korean War. This will make maneuver forces vulnerable to air attack by fixed- and rotary-wing aircraft, unmanned aircraft systems, and cruise missiles. Maneuver forces lack capacity and capability to address these threats and the Army requires a speedy response. Stinger missiles provide a key capability for maneuver forces to defend themselves from aerial observation and attack. However, without direct involvement from senior brigade combat team leaders and effective leader training, these missiles will become dead weight at best or a fratricide in waiting at worst. Units must plan effectively to utilize this capability and ensure it ties directly to their scheme of maneuver as opposed to simply task-organizing one Stinger team per company.
