Computational Science and Its Applications -- ICCSA 2012 Jan 24 2020 The four-volume set LNCS 7333-7336 constitutes the refereed proceedings of the 12th International Conference on Computational Science and Its Applications, ICCSA 2012, held in Salvador de Bahia, Brazil, in June 2012. The four volumes contain papers

presented in the following workshops: 7333 - advances in high performance algorithms and applications (AHPAA); bioinspired computing and applications (BIOCA); computational geometry and applications (CGA); chemistry and materials sciences and technologies (CMST); cities, technologies and planning (CTP); 7334 - econometrics and multidimensional evaluation in the urban environment (EMEUE); geographical analysis, urban modeling, spatial statistics (Geo-An-Mod); 7335 - optimization techniques and applications (OTA); mobile communications (MC); mobile-computing, sensing and actuation for cyber physical systems (MSA4CPS); remote sensing (RS); 7336 - software engineering processes and applications (SEPA); software quality (SQ); security and privacy in computational sciences (SPCS); soft computing and data engineering (SCDE). The topics of the fully refereed papers are structured according to the four major conference themes: 7333 - computational methods, algorithms and scientific application; 7334 - geometric modelling, graphics and visualization; 7335 - information systems and technologies; 7336 - high performance computing and networks.

The Birth Of A Mother Mar 08 2021 As you prepare to become a mother, you face an experience unlike any other in your life. Having a baby will redirect your preferences and pleasures and, most likely, will realign some of your values. As you undergo this unique psychological transformation, you will be guided by new hopes, fears, and priorities. In a most startling way, having a child will influence all of your closest relationships and redefine your role in your family's history. The charting of this remarkable, new realm is the subject of this compelling book. Renowned psychiatrist Daniel N. Stern has joined forces with pediatrician and child psychiatrist Nadia Bruschweiler-Stern and journalist Alison Freeland to paint a wonderfully evocative picture of the psychology of motherhood. At the heart of *The Birth of a Mother* is an arresting premise: Just as a baby develops physically in utero and after birth, so a mother is born psychologically in the many months that precede and follow the birth of her baby. The recognition of this inner transformation emerges from hundreds of interviews with new mothers and decades of clinical experience. Filled with revealing case studies and personal comments from women who have shared this experience, this book will serve as an invaluable sourcebook for new mothers, validating the often confusing emotions that accompany the development of this new identity. In addition to providing insight into the unique state of motherhood, the authors touch on related topics such as going back to work, fatherhood, adoption,

and premature birth. During pregnancy, mothers-to-be talk about morning sickness and their changing bodies, and new mothers talk about their exhaustion, the benefits of nursing or bottle-feeding, and the dilemma of whether or when they should return to work. And yet, they can be strangely mute about the dramatic and often overwhelming changes going on in their inner lives. Finally, with *The Birth of a Mother*, these powerful feelings are eloquently put into words.

Climate Chaos Feb 25 2020 A thirty-thousand-year history of the relationship between climate and civilization that teaches powerful lessons about how humankind can survive. Human-made climate change may have begun in the last two hundred years, but our species has witnessed many eras of climate instability. The results have not always been pretty. From Ancient Egypt to Rome to the Maya, some of history's mightiest civilizations have been felled by pestilence and glacial melt and drought. The challenges are no less great today. We face hurricanes and megafires and food shortages and more. But we have one powerful advantage as we face our current crisis: the past. Our knowledge of ancient climates has advanced tremendously in the last decade, to the point where we can now reconstruct seasonal weather going back thousands of years and see just how people and nature interacted. The lesson is clear: the societies that survive are those that plan ahead. *Climate Chaos* is a book about saving ourselves. Brian Fagan and Nadia Durrani show in remarkable detail what it was like to battle our climate over centuries and offer us a path to a safer and healthier future.

Working in Public Dec 25 2019 Open source software has undergone significant shift over the past 20 years. Today, often unseen solo operators maintain code used by millions. In *Working in Public*, Nadia Eghbal takes an inside look at modern open software development and its evolution over the last two decades--and its ramifications for an internet reorienting itself around individual creators. She examines GitHub as a platform; the structures, roles, incentives, and relationships of open source projects; and their heretofore unexplored maintenance, via the work that software requires its creators and the costs of production that must be maintained. Open source offers us a model through which to understand the challenges faced by online creators on all platforms."--Publisher description

The Jane Trilogy Jul 24 2022 Meet Jane. Not the stereotypical, angelic and gentle vicars daughter you may first

picture in your mind, but more like her Reverend father than she ever realised in later years. Expect the unexpected - three stories about Jane on her journey of discovery about her own sexuality, naivety, loves and losses. Janes innocence and gullible nature open the door to the unbelievable and opens her soul to the heartache that follows it. Feel the anticipation of the revelations in her family that shake the security she then seeks to find in her adult life as she falls foul to manipulation in desperation to find happiness and feel the happy ever after she craves. Jane is the kind of person who learns the hard way and feels the devastation of the blows life throws at her, with still, undoubtedly more to come. She is the unfortunate casualty of her self, as she takes the risks others would never dare to try, only to end up in the turmoil of the situations she presents to herself. Follow the humorous tales of her journey through life and feel the drama it inevitably deals. Witness the highs and lows of the roller coaster of what could only be another adventure pending, because shes ultimately Jane.

Communicating with Virtual Worlds Jun 22 2022 This volume presents the proceedings of COMPUTER GRAPHICS INTERNATIONAL '93 (COI '93), the Eleventh International Conference of the Computer Graphics Society (CGS), COI '93 has been held in Lausanne, Switzerland from June 21-25,1993 under the theme Communicating with Virtual Worlds. Since its foundation in 1983, COI conference has continued to attract high qUality research articles in all aspects of computer graphics and its applications. Previous conferences in this series were held in Japan (1983-1987), in Switzerland (1988), in the United Kingdom (1989), in Singapore (1990), in the United States (1991), and in Japan (1992). Future CG International conferences are planned in Australia (1994), and in the United Kingdom (1995). COS also organizes each year Computer Animation in Geneva, an international workshop and Computer Generated Film Festival. Two new CGS events are planned in 1993: Pacific Graphics '93 in Seoul and MMM '93, an International Conference on Multi-Media MOdeling in Singapore.

Locality and Belonging Feb 04 2021 Locality and Belonging provides an international overview of the close relationship between territory and cultural identity. The issue of 'belonging' has long been recognized as crucial to the study of identity within anthropology. Here, contributors from Sweden, Norway, the Netherlands, France and the

UK present rigorous case studies of 'belonging' from the UK, South Africa, Argentina, Zanzibar, Amazonia, Indonesia and West Africa. Among the themes explored are: * space, memory and ethnicity * the mnemonic use of objects * mythologies of football and history * use of 'natural features' of the environment * nationhood and post-colonial identity making.

Fisheries Development In India: The Political Economy Of Unsustainable Dec 29 2022 Sustainable Development Of Fisheries In India Is A Major Concern For The Public, The Industry As Well As The Administration As It Contributes Significantly To The National Economy : To Food Supply, Employment, Earnings, Foreign Exchange, Public Revenue, Regional Development, Recreation, Social Welfare Etc. Nonetheless, The Sustainability Of Indian Fisheries, Like Most Other Nations' Fisheries, Is Threatened By A Number Of Ecological, Economic, Social, Cultural, Institutional And Technological Constraints. This Book Explores The Sustainability Issues Of Indian Fisheries At Length And Suggests 'Stanard' Global Prescriptions For Sustainable Development.

Engineering Record, Building Record and Sanitary Engineer Apr 20 2022

Hooghly Oct 27 2022 The Hooghly, a distributary of the Ganges flowing south to the Bay of Bengal, is now little known outside of India. Yet for centuries it was a river of truly global significance, attracting merchants, missionaries, mercenaries, statesmen, laborers and others from Europe, Asia and beyond. Hooghly seeks to restore the waterway to the heart of global history. Focusing in turn on the role of and competition between those who struggled to control the river--the Portuguese, the Mughals, the Dutch, the French and finally the British, who built their imperial capital, Calcutta, on its banks--the author considers how the Hooghly was integrated into global networks of encounter and exchange, and the dramatic consequences that ensued. Traveling up and down the river, Robert Ivermee explores themes of enduring concern, among them the dynamics of modern capitalism and the power of large corporations; migration and human trafficking; the role of new technologies in revolutionizing social relations; and the human impact on the natural world. The Hooghly's global history, he concludes, may offer lessons for India as it emerges as a world superpower.

Serenade for Nadia Jan 30 2023 Named a Favorite Book of the Year by readers of the Boston Globe and a Best Book of the Year by PopMatters In this heartbreaking Turkish novel based on the real-life sinking of a refugee ship during World War II, an elderly professor leaves America to revisit the city where he last glimpsed his beloved wife. Istanbul, 2001. Maya Duran is a single mother struggling to balance a demanding job at Istanbul University with the challenges of raising a teenage son. Her worries increase when she is tasked with looking after the enigmatic Maximilian Wagner, an elderly German-born Harvard professor visiting the city at the university's invitation. Although he is distant at first, Maya gradually learns of the tragic circumstances that brought him to Istanbul sixty years before, and the dark realities that continue to haunt him. Inspired by the 1942 Struma disaster, in which nearly 800 Jewish refugees perished after the ship carrying them to Palestine was torpedoed off the coast of Turkey, *Serenade for Nadia* is both a poignant love story and a gripping testament to the power of human connection in crisis.

Indian and Eastern Engineer Feb 16 2022 Vol. 29, no. 8-37, no. 7 (Aug., 1937-July, 1944) include the section: Aviation.

People and Computers XV — Interaction without Frontiers Sep 13 2021 In 2001 AFIHM and the British HCI Group combined their annual conferences, bringing together the best features of each organisation's separate conference series, and providing a special opportunity for the French- and English-speaking HCI communities to interact. This volume contains the full papers presented at IHM-HCI 2001, the 15th annual conference of the British HCI group, a specialist group of the British Computer Society and the 14th annual conference of the Association Francophone d'interaction Homme-Machine, an independent association for any French-speaking person who is interested in Human-Computer Interaction. Human-Computer Interaction is a discipline well-suited to such a multi-linguistic and multi-cultural conference since it brings together researchers and practitioners from a variety of disciplines with very different ways of thinking and working. As a community we are already used to tackling the challenges of working across such boundaries, dealing with the problems and taking advantage of the richness of the

resulting insights: interaction without frontiers. The papers presented in this volume cover all the main areas of HCI research, but also focus on considering the challenges of new applications addressing the following themes: - Enriching HCI by crossing national, linguistic and cultural boundaries; - Achieving greater co-operation between disciplines to deliver usable, useful and exciting design solutions; - Benefiting from experience gained in other application areas; - Transcending interaction constraints through the use of novel technologies; - Supporting mobile users.

Advances in Computer Graphics Jun 10 2021 This book constitutes the refereed proceedings of the 36th Computer Graphics International Conference, CGI 2019, held in Calgary, AB, Canada, in June 2019. The 30 revised full papers presented together with 28 short papers were carefully reviewed and selected from 231 submissions. The papers address topics such as: 3D reconstruction and rendering, virtual reality and augmented reality, computer animation, geometric modelling, geometric computing, shape and surface modelling, visual analytics, image processing, pattern recognition, motion planning, gait and activity biometric recognition, machine learning for graphics and applications in security, smart electronics, autonomous navigation systems, robotics, geographical information systems, and medicine and art.

Advances in Computer Graphics Nov 03 2020 This book constitutes the refereed proceedings of the 37th Computer Graphics International Conference, CGI 2020, held in Geneva, Switzerland, in October 2020. The conference was held virtually. The 43 full papers presented together with 3 short papers were carefully reviewed and selected from 189 submissions. The papers address topics such as: virtual reality; rendering and textures; augmented and mixed reality; video processing; image processing; fluid simulation and control; meshes and topology; visual simulation and aesthetics; human computer interaction; computer animation; geometric computing; robotics and vision; scientific visualization; and machine learning for graphics.

Her Amish Protectors Nov 27 2022 She had wanted a simpler life in Amish country... The caring community in her new Missouri small town was a healing salve for Nadia Markovic's wounded spirit...until someone broke into her apartment above her Amish quilt shop and robbed her while she was sleeping. The thief made off with all the funds they'd just raised through the sale of her neighbours' handmade quilts. And police chief Ben Slater can't rule her out as the prime suspect. Only her Amish friends are willing to give her the benefit of the doubt. People are angry enough to even target her with violence... But while Ben might not trust her, he's committed to protecting her, confusing her feelings for this man who's pulling her apart!

The Tribological and Structural Behavior of Untextured and Textured Plain Bearings Oct 03 2020

Hydrodynamic bearings and aerodynamic bearings are components which ensure the guiding of rotating machines, such as turbines and reactors. This equipment operates under very severe operating conditions, with a high rotational speed and high radial load. In order to improve the hydrodynamic performance of these rotating machines, manufacturers specializing in the manufacture of hydrodynamic plain bearings have designed a bearing model with its textured interior surface. This book provides a numerical analysis carried out to observe the effect of a turbulent fluid flow in a non-textured and textured plain bearing and to see the improvement in hydrodynamic and tribological performance on both un-textured and textured surfaces of plain bearings, under severe operating parameters. It also presents an analysis of the structural behavior of a hydrodynamic and aerodynamic bearing with a non-textured and textured surface.

Intelligent Techniques and Applications in Science and Technology May 29 2020 This book provides innovative ideas on achieving sustainable development and using green technologies to conserve our ecosystem. Innovation is the successful exploitation of a new idea. Through innovation, we can achieve MORE while using LESS. Innovations in science & technology will not only help mankind as a whole, but also contribute to the economic growth of individual countries. It is essential that the global problem of environmental degradation be addressed

immediately, and thus, we need to rethink the concept of sustainable development. Indeed, new environmentally friendly technologies are fundamental to attaining sustainable development. The book shares a wealth of innovative green technological ideas on how to preserve and improve the quality of the environment, and how to establish a more resource-efficient and sustainable society. The book provides an interdisciplinary approach to addressing various technical issues and capitalizing on advances in computing & optimization for scientific & technological development, smart information, communication, bio-monitoring, smart cities, food quality assessment, waste management, environmental aspects, alternative energies, sustainable infrastructure development, etc. In short, it offers valuable information and insights for budding engineers, researchers, upcoming young minds and industry professionals, promoting awareness for recent advances in the various fields mentioned above.

Among Bright Stars... (Neo-human #2) Feb 28 2023 Humanity's future, isn't human... Nadia Korelia, Falcanian queen, has spent the last three years assembling together her sibling Morningstars. Artificial people, who are in every way stronger, smarter and more beautiful. Can Nadia unite her fellow Morningstars, even as the Falcanians use war, to broker for peace?

Sanctuary Deceived Oct 15 2021 Christian Romantic Suspense from USA Today Bestselling author Lisa Phillips
Thrust from their home, Bolton Farrera and Nadia Marie Carleigh are isolated from everyone they trust, and Bolton can barely walk. In need of experimental surgery, Bolton has exactly one thing on his mind: getting to the stash he hid years ago. But the man Bolton put in jail has escaped, and the hunt for revenge is on. Nadia Marie knows God put her with Bolton so she could help him. But when Bolton's past catches up to both of them, the cost is high. Nadia must choose between what she thought the future would hold, and the reality she's faced with. She must love unconditionally, even if she has to walk away from the one thing she wants. Bolton must protect the people he cares about, and maybe even admit the real truth about who he is. Even if uncovering his deception means he loses everything.
