Try this Innovative exercises illustrate what you've learnt and how to use it. Provides exercises for tuition in basic accounting practices. To be used with the text book of the same title. Suggested level: senior secondary. This text helps students hit the road with a practical set of tools, and the confidence they need to use those tools effectively in making business decisions. The goal is to introduce a new "Principles of Accounting" text that better reflects a more conceptual and decision-making approach to the material. The authors have taken a new "macro- to micro-" approach to the Principles of Accounting course by starting with a discussion of real financial statements first, rather than starting with the Accounting Cycle (although the Accounting Cycle is thoroughly covered in Chapters 3 and 4). The objective is to establish how a financial statement communicates the financing, investing, and operating activities of a business to users of accounting information. They motivate students by grounding the discussion in the real world, showing them the relevance of the topics covered to their future career. Want to become an accountant? Own a small business but need help balancing your books? Worried about managing your finances under the cloud of the recession? This hands-on workbook gets you up to speed with the basics of business accounting, including reading financial reports, establishing budgets, controlling cash flow, and making wise financial decisions. The question and answer sections encourage you to find your own solutions to challenging accounting problems - and there's plenty of space to scribble your workings out!
