In the newly revised eighth edition of Advanced Accounting, a decorated team of accounting professionals delivers authoritative and comprehensive coverage of all three methods of consolidated financial reporting: cost, partial equity, and complete equity. This invaluable work compares and contrasts United States and international principles, drawing reader attention to enduring differences between the two frameworks. Opportunity and achievement, while inextricably connected, are very different goals. Every American will not go to college, but every American should be given a fair chance to be prepared for college. In communities across the U.S., children lack the crucial resources and opportunities, inside and outside of schools that they need if they are to reach their potential. Closing the Opportunity Gap offers accessible, research-based essays written by top experts who highlight the discrepancies that exist in our public schools, focusing on how policy decisions and life circumstances conspire to create the "opportunity gap" that leads inexorably to stark achievement gaps. They also describe sensible policies grounded in evidence that can restore and enhance opportunities. Moving beyond conventional academic discourse, Closing the Opportunity Gap will spark vital new conversations about what schools, parents, educators, and policymakers can and should do to give all children a fair chance to thrive. During the 1960s and 1970s a remarkable series of books was produced by academic staff in the field of accounting at the University of Sydney. It was a period when academic research was largely analytical rather than empirically-based. For the most part, the interests of academics at Sydney were largely directed at questioning the status quo -

either in the way accounting or auditing was practiced, or in the conventional wisdom expressed in textbooks of the time. The Sydney Accounting Classics series reflects the diversity of interests of the 'Sydney school' at that time. It also recognises the tremendous impact of the foundation professor of accounting, R.J. Chambers. This reprint series ensures that the ideas developed during this period remain available to new generations of scholars and researchers. The Sydney Accounting Classics series is an initiative of the Accounting Foundation, in association with Sydney University Press. Accounting for Common Costs: The editor of the 1978 edition called this a 'seminal work ... in one of the most difficult allocation problems in accounting'. Solutions manual for sale to students provides full solutions for odd-numbered end-of-chapter assignment items, including questions, exercises, problems, and cases. Business scandals from Enron to WorldCom have escalated concerns about corporate governance into a full-blown crisis. Institutional investors and legislators have dominated the debate and enacted important changes in corporate accounting and other areas. But Colin B. Carter and Jay W. Lorsch say that we must now focus on the performance of corporate boards. This timely book argues that boards are being pressed to perform unrealistic duties given their traditional structure, processes, and membership. Carter and Lorsch propose a strategic redesign of boards--making them better attuned to their oversight, decision-making, and advisory roles--to enable directors to meet 21st century challenges successfully. Based on the authors' deep expertise and longtime experience working with boards around the world, and on a probing survey of CEOs, Carter and Lorsch help boards to develop a realistic value proposition customized to the company they serve. The authors explore the core dilemmas and responsibilities boards face and outline a framework for designing the most effective structure, makeup, size, and culture. This book provides a candid account of the current state of boards and points the way in a time of crisis and change. This volume 's focus on the environmental accounting of supply chain processes is of particular relevance because these processes supply data about the environmental impact of relationships between business organisations, an area where the boundary separating internal and external accounting is ill-defined. Here, contributors advocate what they term 'accounting for cooperation' as a more environmentally positive complement to the paradigmatic practice of 'accounting for competition'. "Realizing that most students in an introductory managerial accounting course are not going to major in accounting, this book seeks to position managerial accounting in a broader context of business decision making."--Pref. "Warning: Your career might be in danger of going off the rails. You probably have blind spots that are leaving you closer to the edge than you realize. Fortunately, Carter Cast has the solution. In this smart, engaging book he shows you how to avoid career derailment by becoming more self-aware, more agile, and more effective. This is the book you wish you had twenty years ago, which is why you should read it now." -- Daniel H. Pink, New York Times bestselling author of Drive and To Sell Is Human The Right -- and Wrong -- Stuff is a candid, unvarnished guide to the bumpy road to success. The shocking truth is that 98 percent of us have at least one career-derailment risk factor, and half to two-thirds actually go off the rails. And the reason why people get fired, demoted, or plateau is because they let the wrong stuff act out, not because they lack talent, energy, experience, or credentials. Carter Cast himself had all the right stuff for a brilliant career, when he was called into his boss's office and berated for being obstinate, resistant, and insubordinate. That defining moment led to a years-long effort to understand why he came so close to getting fired, and what it takes to build a successful career. His wide range of experiences as a rising, falling, and then rising star again at PepsiCo, an entrepreneur, the CEO of Walmart.com, and now a professor and venture capitalist enables him to identify the five archetypes found in every workplace. You'll recognize people you work with (maybe even yourself) in Captain Fantastic, the Solo Flyer, Version 1.0, the One-Trick Pony, and the Whirling Dervish, and, thanks to Cast's insights, they won't be able to trip up your future. Nearly 14 percent of working age Americans are either starting or running a business. 50 percent of those businesses will fail in five years or decline over 70 percent after ten years. Starting a company is no walk in the park-- it takes confidence and heart, but most of all, it takes planning and understanding what exactly your business needs to succeed in its niche. The worst thing you can do when taking that leap to start a business is leaping "without a parachute." Dr. Sterling L. Carter and Stephen Levi Carter, MBA, know this all too well, and in Double Your Success, they share their decades of experience and knowledge so that you can plan how to build your business every step of the way. In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome. Froelich explains why stocks and bonds do not have the financial horsepower to generate a reliable source of monthly income to provide for a person's retirement needs. Instead, he argues that real estate should be the cornerstone of any investment strategy. From "a first-rate writer in the fascinating tradition of Junger and Krakauer" (Jim Harrison, author of Legends of the Fall), a sweeping account of civilization's complete dependence on copper and what it all means for people, nature, and the global economy. A SWEEPING ACCOUNT OF CIVILIZATION'S COMPLETE DEPENDENCE ON COPPER AND WHAT IT MEANS FOR PEOPLE, NATURE, AND OUR GLOBAL ECONOMY COPPER is a miraculous and contradictory metal, essential to nearly every human enterprise. For most of recorded

history, this remarkably pliable and sturdy substance has proven invaluable: not only did the ancient Romans build their empire on mining copper but Christopher Columbus protected his ships from rot by lining their hulls with it. Today, the metal can be found in every house, car, airplane, cell phone, computer, and home appliance the world over, including in all the new, so-called green technologies. Yet the history of copper extraction and our present relationship with the metal are fraught with profound difficulties. Copper mining causes irrevocable damage to the Earth, releasing arsenic, cyanide, sulfuric acid, and other deadly pollutants into the air and water. And the mines themselves have significant effects on the economies and wellbeing of the communities where they are located. With *Red Summer and Fools Rush In*, Bill Carter has earned a reputation as an on-the-ground journalist adept at connecting the local elements of a story to its largest consequences. Carter does this again—and brilliantly—in *Boom, Bust, Boom*, exploring in an entertaining and fact-rich narrative the very human dimension of copper extraction and the colossal implications the industry has for every one of us. Starting in his own backyard in the old mining town of Bisbee, Arizona—where he discovers that the dirt in his garden contains double the acceptable level of arsenic—Bill Carter follows the story of copper to the controversial Grasberg copper mine in Indonesia; to the “ring” at the London Metal Exchange, where a select group of traders buy and sell enormous amounts of the metal; and to an Alaskan salmon run threatened by mining. *Boom, Bust, Boom* is a highly readable account—part social history, part mining-town exploration, and part environmental investigation. Page by page, Carter blends the personal and the international in a narrative that helps us understand the paradoxical relationship we have with a substance whose necessity to civilization costs the environment and the people who mine it dearly. The result is a work of first-rate journalism that fascinates on every level. *Technological Solutions for Modern Logistics and Supply Chain Management* highlights theories and technological growth in applied research as well as advances in logistics, supply chains, and industry experiences. Aiming to enhance the expansions made towards an efficient and sustainable economy, this book is essential for providing researchers, practitioners and academicians with insight into a wide range of topics.
