The Waterbug Book Jun 15 2022 Freshwater invertebrates identification guide for both professionals and non-professionals. Contains a key to all the macroinvertebrate groups and photographs of live specimens.

Social, Cultural, and Behavioral Modeling Feb 23 2023 This book constitutes the proceedings of the 12th International Conference on Social, Cultural, and Behavioral Modeling, SBP-BRiMS 2019, held in Washington, DC, USA, in July 2019. The total of 28 papers presented in this volume was carefully reviewed and selected from 72 submissions. The papers in this volume show, people, theories, methods and data from a wide number of disciplines including computer science, psychology, sociology, communication science, public health, bioinformatics, political science, and organizational science. Numerous types of computational methods are used include, but not limited to, machine learning, language technology, social network analysis and visualization, agent-based simulation, and statistics.

Primary Productivity and Biogeochemical Cycles in the Sea Mar 20 2020 Biological processes in the oceans play a crucial role in regulating the fluxes of many important elements such as carbon, nitrogen, sulfur, oxygen, phosphorus, and silicon. As we come to the end of the 20th century, oceanographers have increasingly focussed on how these elements are cycled within the ocean, the interdependencies of these cycles, and the effect of the cycle on the composition of the earth's atmosphere and climate. Many techniques and tools have been developed or adapted over the past decade to help in this effort. These include satellite sensors of upper ocean phytoplankton distributions, flow cytometry, molecular biological probes, sophisticated moored and shipboard instrumentation, and vastly increased numerical modeling capabilities. This volume is the result of the 37th Brookhaven Symposium in Biology, in which a wide spectrum of oceanographers, chemists, biologists, and modelers discussed the progress in understanding the role of primary producers in biogeochemical cycles. The symposium is dedicated to Dr. Richard W. Eppley, an intellectual giant in biological oceanography, who inspired a generation of scientists to delve into problems of understanding biogeochemical cycles in the sea. We gratefully acknowledge support from the U.S. Department of Energy, the National Aeronautics and Space Administration, the National Science Foundation, the National Oceanic and Atmospheric Administration, the Electric Power Research Institute, and the Environmental Protection Agency. Special thanks to Claire Lamberti for her help in producing this volume.

Parasitology Feb 11 2022 Parasitology: An Integrated Approach, provides a concise, student-friendly account of parasites and parasite relationships that is supported by case studies and suggestions for student projects. The book focuses strongly on parasite interactions with other pathogens and in particular parasite-HIV interactions, as well as looking at how host behaviour contributes to the spread of infections. There is a consideration of the positive aspects of parasite infections, how humans have used parasites for their own advantage and also how parasite infections affect the welfare of captive and domestic animals. The emphasis of Parasitology is on recent research throughout and each chapter ends with a brief discussion of future developments. This text is not simply an updated version of typical parasitology books but takes an integrated approach and explains how the study of parasites requires an understanding of a wide range of other topics from molecular biology and immunology to the interactions of parasites with both their hosts and other pathogens.

African Perspectives on Reshaping Rural Development Apr 13 2022 Development studies in developing regions such as Southern Africa rely heavily on materials developed by Europeans with a European context. European dominance in development studies emanates from the fact that the discipline was first developed by Europeans. Some argue that this has led to distortions in theory and practice of development in Southern Africa. This book wishes to begin Africa's expedition to develop proper material to de-Westernize while Africanizing the context of the scholarship of rural development. African Perspectives on Reshaping Rural Development is an essential reference source that repositions the context of rural development studies from the Western-centric knowledge system into an African context in order to solve African-centered problems. Featuring research on topics such as food security, poverty reduction, and community engagement, this book is ideally designed for planners, researchers, practitioners, policymakers, government officials, academicians, and students seeking clarity on theory and practice of development in Africa.

Breaking the Colonial "Contract" Jan 30 2021 The book exposes various mechanisms and methods by which covert colonial mechanisms are employed to perpetuate colonialism, especially in Africa. Less overt and more covert perpetuation of colonialism is done through the use of networks. The main achievement of the initial phase of colonialism was the establishment of networks that are nefarious and omnipresent; constituting "distributed presence," which allows for "action at a distance." As a result, colonial subjects became willing participants in these processes, unbeknownst to them, which perpetuated their own colonialism. The book exposes forms of colonialism where manufactured consent is used to perpetuate colonialism. Trapped in this capitalist, Western, Christian language and moral world order without sovereignty, African countries continuously sink deeper into the colonial quagmire.

Inclusive Green Growth Sep 18 2022 Fostering inclusive green growth in Africa means addressing existing and emerging development challenges, while efficiently managing Africa's natural capital and building resilience to environmental, social and economic risks. Although this new paradigm for development has the potential to create tremendous business opportunities, there are also challenges. This book provides empirical evidence on the conditions for the emergence of green businesses in Africa. It includes 13 case studies, which identify the determinants of small and medium-size enterprises' engagement in inclusive and sustainable growth in rural Africa, and the factors that hinder eco-innovation in business and entrepreneurial activities. Furthermore it discusses appropriate regulations and policies to stimulate the development of green business in Africa. Offering insights into the relationship between eco-innovation, labor productivity and business competitiveness in rural Africa, this book appeals to scholars, policy makers and practitioners interested in a green economy for Africa.

African Journal of Reproductive Health Sep 06 2021 African Journal of Reproductive Health (AJRH) is a multidisciplinary and international Journal published quarterly (March, June, September, and December) by the Women's Health and Action Research Centre (a Non-governmental Organization with headquarters in Nigeria). The publication of the journal started in 1997. As of March 2016, 64 editions have been published. The journal focuses on publishing original research, comprehensive review articles, short reports and commentaries on reproductive health in Africa. It strives to provide a forum for both African and foreign authors working in Africa to share findings about all aspects of reproductive health and also to disseminate innovative, relevant, and useful information on reproductive health throughout the continent.

Handbook of Research on Mixed Methods Research in Information Science Feb 28 2021 Mixed methods research is becoming prevalent in many fields, yet little has been done to elevate mixed methods research in information science. A comprehensive picture of information science and its problems is needed to further understand and address the issues associated with it as well as how mixed methods research can be adapted and used. The Handbook of Research on Mixed Methods Research in Information Science discusses the quality of mixed methods studies and methodological transparency, sampling in mixed methods research, and the application of theory in mixed methods research throughout various contexts. Covering topics such as the issues and potential directions for further research in mixed methods, this comprehensive major reference work is ideal for researchers, policymakers, academicians, librarians, practitioners, instructors, and students.

Alternative and Complementary Methods for the Control of Infectious Diseases in Animals Dec 21 2022

Sustainable and Smart Spatial Planning in Africa May 14 2022 This book clarifies the smart city concept that is gaining application in Sub – Saharan Africa. It shows how the smart concept can be used to address problems that

would be difficult and more expensive to solve using traditional techniques such as employment creation. This is done through elaboration of the African interpretation of smartness, using tools for smart solid waste management, e-governance, smart energy, and smart infrastructure. The case studies selected, and each chapter explain a different dimension of the smart city concept and offer innovative solutions to problems of rapid urbanization. It lays the theoretical foundation for further research on smart cities and rural areas in Africa.

Quantity Surveying N4 Student's Book Oct 27 2020

The National Agricultural Directory 2011 Dec 09 2021

Green Economy in the Transport Sector Feb 17 2020 This open access book is interdisciplinary and provides cross-sectoral and multi-dimensional exploration of sustainable development and transportation in South Africa. Drawing on work from different disciplines, the book contributes not only to academia but also seeks to inform urban and regional policy with the view of contributing to the national aspirations of South Africa as espoused in the National Development Plan (NDP), 2030, National Spatial Development Framework (NSDF) Draft (2019), National Climate Change Adaptation Strategy (NCASS) Draft (2019), Green Transport Strategy for South Africa (2018–2050), and National Transportation Plan (NATMAP), 2050. Adopting a multi-dimensional assessment, the book provides a background for co-production concerning climate change, sustainable development, and transportation in the Global South. The book contributes in its analysis of the institutional and legislative framework that relates to the climate change, skills and knowledge transfer, sustainable development, and transportation in South Africa, as these are responsible for the evolution of the green economy and transport sector in the country. The connections among different sectors and issues such as environment, transport modes, technology innovation, vehicle management and emission control, skills and knowledge transfer, legislative and policy framework, and the wider objectives of the sustainable development goals (SDGs), especially goals 11 to 13. The success stories relating to climate change, sustainable development, and transportation in South Africa are identified together with the best possible practices that may inform better environmental, urban and regional planning, policy, practice, and management.

Global Climate Change and Environmental Policy Aug 17 2022 Global climate change threatens human existence through its potential impact on agriculture and the environment. Agriculture is climate-sensitive, and climate variability and climate change have net negative impact on it. Additionally, the agricultural landscape is affected by monoculture and agro-biodiversity loss, soil fertility depletion and soil loss, competition from biofuel production, crop yield plateaus and invasive species. Nevertheless, the global agricultural production system has to meet the food demands from the growing human population, which is set to exceed 10 billion by 2050. This book discusses the impacts of climate change on agriculture, animal husbandry and rural livelihoods. Further, since agriculture, forestry and other land-use sectors contribute about 10–12 gigatonnes of CO₂-equivalent per year, it argues that agricultural policy must dovetail adaptation and mitigation strategies to reduce greenhouse gases emissions. This calls for a reformative and disruptive agricultural strategy like climate-smart agriculture, which can operate at all spatio-temporal scales with few modifications. The book also redefines sustainable agriculture through the lens of climate-smart agriculture in the context of the sustainability of Earth's life- support system and inter- and intra-generational equity. The climate-smart agriculture approach is gaining currency thanks to its inherent positive potential, and its goal to establish an agricultural system which includes "climate-smart food systems", "climate-proof farms", and "climate-smart soils". Climate-smart agriculture provides a pathway to achieve sustainable development goals which focus on poverty reduction, food security, and environmental health.

Tsotsi Jun 22 2020 In the Johannesburg township of Soweto, a young black gangster in South Africa, who leads a group of violent criminals, slowly discovers the meaning of compassion, dignity, and his own humanity.

TRANSFORMATION AND DEVELOPMENT OF HUMAN SOCIETY: Nov 08 2021 In this book, the promovendus investigates the critical role a preacher and his/her homilies have in bringing transformation, development and healing in the human society. The investigation shows how a preacher has been sidelined on issues of progress, when from time immemorial he/she has been a critical and pivotal component in the phenomenon. The study is an attempt to reclaim a preacher's role in bringing progress and healing in underdeveloped communities through homilies, particularly, in Venda, rural South Africa. This book proposes a preacher as the transformer, developer and healer of the people.

Microbiomes Aug 05 2021 This book examines an important paradigm shift in biology: Plants and animals, traditionally viewed as individuals, are now considered to be complex systems and host to a plethora of microorganisms. After first presenting historical aspects of microbiota research, bacterial compositions of individual microbiomes and the critical analysis of current methods, the book discusses how microbial communities inside the human body are profoundly affected by numerous factors, such as macro- and micro-nutrients, physical exercise, antibiotics, gender and age. As described by current research, the author highlights how microbiomes contribute to the fitness of the host by providing nutrients, inhibiting pathogens, aiding in the storage of fat during pregnancy, and contributing to development and behavior. The author not only focusses on prokaryotic components in microbiomes, but also addresses single-cell eukaryotes and viruses. This follow-up to the successful book *The Hologenome Concept: Human, Animal and Plant Microbiota*, published in 2013, provides a contemporary overview of microbiomes. It appeals to anyone working in the life sciences and biomedicine.

World Health Organization on TB Infection Control in Health - Care Facilities, Congregate Settings and Households Apr 01 2021 This document is an evidence-based policy for the implementation of sound tuberculosis (TB) infection control by all stakeholders. The evidence base for the policy was established through a systematic literature review. The review highlighted some areas where evidence supports interventions that add value to TB infection control. A number of recommendations were developed, based on this evidence and on additional factors, such as feasibility, programmatic implementation and anticipated cost.

Cry, the Beloved Country May 22 2020

Consumption Patterns of Vitamin A-rich Foods of 10-13 Years Old Children Living in a Rural Area in Venda Jan 22 2023 Vitamin A deficiency (VAD) continues to be a major health problem in developing countries. In South Africa, in 1999, one out of three children under the age of six years in the country had poor/ marginal vitamin A status. Limpopo Province was one of the provinces that most seriously affected by VAD. The study aim was to explore and describe the consumption patterns of vitamin A-rich foods of 10-13 year old children living in a rural area in Venda, and consequently making recommendations on nutrition education in this regard. A survey was conducted in Vyeboom Village in Limpopo Province, at Makhado local municipality in the Vhembe District. About 155 school children aged 10-13 years (boys and girls) participated in this study, using convenience, random and stratified sampling to draw the sample from three primary schools (Avhatondwi, Tshirunzanani and Thomas Ntshavheni). Data was collected during winter of 2006 using a socio-demographic questionnaire, the 24-hour recall and non-quantitative food-frequency questionnaires. The data was divided into four subsections regarding the 10-13 year old children that participated in this study, namely: the demographic information, food habits, food consumption patterns, and foods consumed rich in vitamin A. The SAS statistical analysis (version 8.2) software was used to analyze the data from the questionnaire by means of descriptive statistics (percentages, frequencies, means and summary of the tables). Inferential statistics (two way tables and chi-square tests) were used to test the associations between two categorical variables. Mothers were the caretakers in the families, because she mostly played a major role in the decision-making, preparation and serving of the food that were consumed by these children. Social cultural factors influenced the children's food intake, because some of these foods were especially low in vitamin A and high in sugar content (e.g. sweets), compared to those foods that children were forbidden to eat (e.g. liver) which were high in vitamin A and other nutrients. The foods that children were mostly forced to eat (dark green leafy vegetables) were very nutritious and given in order to prevent hunger and wastage (left-over in the morning). The general meal pattern of these children was three meals a day with two, one or no snacks in between meals. The mostly consumed foods during these meals were bread, tea, stiff and soft maize meal porridge, dark green leafy vegetables and meat (chicken). Dark green leafy vegetables played an important role in supplying beta-carotene to these children, while the intake of retinol-rich foods was poor because they are expensive and labeled as highly allergenic, whilst other foods were forbidden. Intake of fortified foods was very high because porridge was the staple food and commonly consumed during lunch and supper. The results provided insight regarding the food habits, consumption patterns and the intake of vitamin A rich foods and were used to substantiate recommendations aimed at the improvement of the intake vitamin A rich foods among the children.

Genital Cutting: Protecting Children from Medical, Cultural, and Religious Infringements Jul 04 2021 This volume contains the proceedings of the 10th International Symposium on Circumcision, Genital Integrity, and Human

Rights. Authors are international experts in their fields, and the book contains the most up-to-date information on the issue of genital cutting of infants and children from medical, legal, bioethical, and human rights perspectives.

Africa Insight Jul 16 2022

Collaboration and Multi-Stakeholder Engagement in Landscape Governance and Management in Africa Jun 03 2021 The severity of interconnected socio-economic and environmental impacts on landscapes and people across Africa are exacerbated as a result of land degradation, conflict, poor governance, competition for land and inequality, and exacerbated by climate change. In pursuing pathways towards a more resilient future, collaborative and multi-stakeholder governance and management of landscapes have been promoted by government agencies, NGOs and conservation organisations as a possible solution. However, there is no single way to achieve effective collaboration, and different landscape projects have experimented with different entry points and engagement processes. Grounded in partnerships amongst researchers, practitioners and development partners with expertise in landscape governance and management in Africa, this book describes and collates key lessons from practice for supporting more resilient and equitable landscapes.

Spatial Planning in Service Delivery Oct 19 2022 This volume presents a detailed synthesis of the historical, present-day and future state of service delivery in South Africa. The generation and distribution of services in any geographical space has been and is always a source of inequality in human society. Thus, in the context of spatial planning, space is the major factor through which distributive justice and sustainable development can be achieved. To examine the continuation of spatial inequality in service delivery, the authors employed both qualitative and quantitative research methods in a multi-pronged approach, utilizing empirical data from the Vembe District in Limpopo, data from the South African Index of Multiple Deprivation, and representative attitudinal data from the South African Social Attitudes Survey. Ultimately, this study examines spatial differences in living environments with a focus on the distribution of household services and discusses strategies to achieve spatial equality.

My Children! My Africa! (TCG Edition) Jul 24 2020 The search for a means to an end to apartheid erupts into conflict between a black township youth and his "old-fashioned" black teacher.

Microbial Drivers of Sociality – from Multicellularity to Animal Societies Dec 29 2020

Conceptual Foundations - E-Book Aug 25 2020 Best known for its conceptual approach to nursing practice, *Conceptual Foundations: The Bridge to Professional Nursing Practice*, 6th Edition gives you the foundation you need to prepare for your role as a professional nurse. Expert educators Elizabeth E. Friberg and Joan L. Creasia bring together the best minds of nursing for a unique in-depth look at the profession's major theories, practices, and principles. Complete with three all-new chapters and updated content throughout, this expanded sixth edition challenges you to think critically and conceptually. In addition, new Evolve resources mean you can do more online than ever before. Critical thinking exercises at the end of each chapter help you use and apply what you have learned. Case studies throughout the text provide you with opportunities to develop your analytical skills. Objectives at the beginning of each chapter provide a framework for study. Profile in Practice scenarios at the beginning of each chapter introduce real-life situations that accompany the professional behaviors covered in the text. Key points at the end of each chapter reinforce learning objectives and help you focus on important information. NEW! Three all-new chapters bring you the latest information on telehealth in nursing practice, information management, and global rural nursing practice. UPDATED! Integrated and updated information on Health Care Reform Initiatives. UPDATED! Health Policy and Practice and the Nursing Practice Environment chapter features new content on the 2010 Affordable Health Care Act. UPDATED! 2010 Institute of Medicine (IOM) Future of Nursing (FOM) recommendations discussed in Beyond Professional Socialization chapter. UPDATED! Patient Safety chapter offers expanded coverage of QSEN competencies, including Nursing Quality Indicators. UPDATED! Health and Health Promotion chapter now covers the Healthy People 2020 and 2020 National Health Promotion Initiative. UPDATED! Concept of "group think" added to Think Like a Nurse: Essential Thinking Skills for Professional Nurses chapter. UPDATED! Legal Aspects of Nursing Practice chapter features the most up-to-date content on delegation, transferring authority, responsibility, accountability, nurse fatigue, criminalization of unintentional errors, use and abuse of social media and lateral violence.

Associations Between Prenatal Exposure to DDT and DDE and Allergy Symptoms and Diagnoses in the Venda Health Examination of Mothers, Babies and Their Environment (VHEMBE), South Africa Mar 12 2022

"Dichlorodiphenyl trichloroethane (DDT) is an organochlorine insecticide that is banned internationally except for use as part of Indoor Residual Spraying (IRS) programs to control malaria. Although animal studies show that DDT and its breakdown product dichlorodiphenyl dichloroethylene (DDE) affect the immune system and may cause allergies, no studies have examined this question in populations where IRS is conducted. The aim of our study was to investigate whether prenatal exposure to DDT and DDE is associated with allergy symptoms and diagnoses among South African children living in an area where IRS is conducted. To accomplish this aim, we used data from the Venda Health Examination of Mothers, Babies and their Environment (VHEMBE), an ongoing birth cohort study of 752 children born between 2012 and 2013 in the rural Vhembe district of Limpopo, South Africa. We measured maternal peripartum serum concentrations of DDT and DDE, and administered a questionnaire to the caregivers of 655 children aged 3.5 years to collect information on allergy symptoms and diagnoses as well as potential confounders using validated instruments. Using multiple logistic regression models, we found positive associations between DDT and DDE serum concentrations and most of the allergy symptoms and diagnoses. Maternal DDT (Odds Ratio [OR] = 1.5 per 10-fold increase, 95% Confidence Interval [CI] = 1.0, 2.3) and DDE (OR = 1.4, 95% CI = 0.8, 2.4) serum concentrations were most strongly associated with caregiver report of wheezing or whistling in the chest.

Concentrations of DDT and/or DDE were also associated with increased odds of children's chests sounding wheezy during or after exercise, itchy rashes coming and going for at least six months, diagnosis of food allergy, and diagnosis of dust or dust mite allergy but confidence intervals crossed the null. Results suggest that prenatal exposure to DDT, and possibly DDE, is associated with elevated odds of wheezing among children from an IRS area"--

Ethnological Publications Jan 18 2020

The Impact of Social Support on People with HIV/AIDS at Vhembe District Nov 20 2022 This research investigated the impact of social support on people living with HIV/AIDS. The main aim of the research was to establish the impact that social support or lack thereof has on the lives of people living with HIV/AIDS at Vhembe District in Limpopo Province. HIV/AIDS is a stigmatized disease and such stigmatisation together with lack of knowledge and unrealistic fears can lead to communities, families and friends of the infected people treating them inappropriately or detrimentally. Infected people can also choose not to disclose their status because of fear of being stigmatised. However, despite all the negativity surrounding HIV/AIDS epidemic, there are those who are brave enough to disclose their status not only to their families but to their communities as well. In this research ten (10) respondents, both male and females were interviewed by making use of a semi-structured interview schedule. And since HIV/AIDS is a sensitive and personal topic, an availability sampling method was used. The semi-structured interview schedule consisted of both closed and open ended questions. The researcher used the qualitative method. The findings and responses of all the respondents were analysed and discussed in line with the findings that were described in the literature on HIV/AIDS issues by various authors. The findings of this research can be used by the department, social workers, families of infected people, home based care workers, doctors and nurses and other professionals who work closely with HIV/AIDS infected people. These findings can be used to broaden people's understanding on the importance and impact of social support or lack thereof to those who are HIV/AIDS infected.

The New Tribe May 02 2021 From best-selling author Holly Webb comes a brand new series full of mystery and intrigue following the adventures of a very determined heroine and her dog! Holly Webb fans will be thrilled to pieces to discover the adventures of Maisie Hitchins, the pluckiest little detective in Victorian London. Maisie Hitchins lives in her grandmother's boarding house, longing for adventure. She idolizes the famous detective, Gilbert Carrington, and follows his every case. But Maisie is about to be given the opportunity of a lifetime: her own mystery to solve! In the first book in this fantastic new series, Maisie rescues a puppy in peril whilst running an errand, and adopts him. She decides to investigate the puppy's original cruel owner, but instead gets tangled up in an intriguing plot involving stolen sausages, pilfered halfpennies and a fast-paced bicycle chase. The streets of Victorian London are never safe, but Maisie's on the case!

Water Pollution XIV Jan 10 2022 Water pollution problems are of continued importance around the world, with an impact on both populated areas and the environment. This volume consists of papers presented at the 14th

International Conference in the series of Monitoring, Modelling and Management of Water Pollution. The environmental problems caused by the increase of pollutant loads discharged into natural water bodies requires the formation of a framework for regulation and control. This framework needs to be based on scientific results that relate pollutant discharge with changes in water quality. The results of these studies allow industry to apply more efficient methods of controlling and treating waste loads, and water authorities to enforce appropriate regulations regarding this matter. Environmental problems are essentially interdisciplinary. Engineers and scientists working in this field must be familiar with a wide range of issues including the physical processes of mixing and dilution, chemical and biological processes, mathematical modelling, data acquisition and measurement, to name but a few. In view of the scarcity of available data, it is important that experiences are shared on an international basis. Thus, a continuous exchange of information between scientists from different countries is essential. Topics covered include: Water contamination; Monitoring, modelling and forecasting; Water management; Wastewater management; Groundwater and aquifers; Flood damage; Freshwater quality; Coastal and offshore pollution; Health risk studies; Agricultural contamination; Industrial pollution; Water reuse; Emerging technologies; Socio-economic-political consequences; Population and climate change; Education and training.

Questions and Replies of the National Assembly Oct 07 2021

Handbook of Biofuels Oct 15 2019 Handbook of Biofuels looks at the many new developments in various type of bioenergy, along with the significant constraints in their production and/or applications. Beyond introducing current approaches and possible future directions of research, this title covers sources and processing of raw materials to downstream processing, constraints involved and research approaches to address and overcome these needs. Different combinations of products from the biorefinery are included, along with the material to answer questions surrounding the optimum process conditions for conversion of different feedstocks to bioenergy, the basis for choosing conversion technology, and what bioenergy products make economic sense. With chapters on the techno-economic analysis of biofuel production and concepts and step-by-step approaches in bioenergy processing, the objective of this book is to present a comprehensive and all-encompassing reference about bioenergy to students, teachers, researchers and professionals. Reviews all existing and emerging technologies surrounding the production of advanced biofuels, including biodiesel and bioethanol Includes biofuel applications with compatible global application case studies Offers new pathways for converting biomass

ICLSSEE 2021 Nov 27 2020 This book contains the proceedings of the The International Conference on Law, Social Science, Economics, and Education (ICLSSEE 2021). Where held on 6 Maret 2021 in Salatiga, Central Java. This conference was held in collaboration Nusantara Training and Research (NTR) with Borobudur University Jakarta and the Research and Development Agency of the Ministry of Home Affairs. The papers from these conferences collected in a proceedings book entitled: Proceedings of The International Conference on Law, Social Science, Economics, and Education (ICLSSEE 2021). The presentation of such conference covering multi disciplines will contribute a lot of inspiring inputs and new knowledge on current trending about: Law, Social Science, Economics, and Education. Thus, this will contribute to the next young generation researches to produce innovative research findings. Hopefully that the scientific attitude and skills through research will promote the development of knowledge generated through research from various scholars in various regions Finally, we would like to express greatest thankful to all colleagues in the steering committee for cooperation in administering and arranging the conference. Hopefully these seminar and conference will be continued in the coming years with many more insight articles from inspiring research. We would also like to thank the invited speakers for their invaluable contribution and for sharing their vision in their talks. We hope to meet you again for the next conference of ICLSSEE.

Sustainability Transitions in South Africa Sep 25 2020 South Africa's transition to a greener economy features prominently in the long-term development vision of the country, and is an integral part of the country's national climate change response strategy. Despite significant gains in socio-economic development since its transition to democracy, the country continues to face the triple challenges of rising unemployment, income inequality and poverty – amid a slowdown in economic growth. Sustainability transitions offer new ways of shifting the trajectory of South Africa's resource-intensive economy towards low-carbon pathways linked to the country's transformative development agenda. Calls for inclusive approaches to greening the South African economy, which addresses the most vulnerable in society and ensures that the benefits of sustainability innovations reach all South Africans, are becoming more pronounced as sustainable development policy reforms are being implemented. The question that should be placed centre stage in South Africa's sustainability discourse is whether notions of justice and inclusivity are being sufficiently addressed in the design and implementation of policy and programme interventions. This book explores South Africa's sustainability transition through reflections on critical policy, economic, technological, social and environmental drivers. It provides a synthesis of theoretical insights, including new models and concepts, and praxis through illustrations from South Africa's growing landscape of sustainable development policies and programmes. Finally, it assesses whether these transition pathways are beginning to reconfigure the system-level structures hindering the country's goal of 'ensuring environmental sustainability and an equitable transition to a low-carbon economy'.
