Today's evangelical community faces a multitude of questions about the creation of the cosmos and the beginning of human history and-quite naturally-we look to the Bible for answers about the origins and meaning of human history. But what are we to do with the stories in the first two chapters of Genesis? Reading Genesis 1-2: An Evangelical Conversation brings together the voices of five prominent evangelical scholars who take on difficult interpretive questions that arise from reading the Bible's first two chapters. Richard Averbeck, Todd Beall, John Collins, Tremper Longman, and John Walton offer their perspectives in a point-counterpoint style. Drawing on a wealth of theological, linguistic, and

historical expertise, this collection is characterized by a close attention to the biblical text and a mutual respect that often sorely lacks in the discussion of origins in the modern evangelical world. Contributors: Richard Averbeck Todd Beall C. John Collins Jud Davis Victor P. Hamilton Tremper Longman III Kenneth J. Turner John Walton If the Word of God is our anchor in the chaos of this world, if it is our assurance that we can know the world and God its Creator, we need confidence that we can understand this Word. Reading and applying the Bible is essential to every facet of Christian life and ministry, yet our ability to do so is under attack from a myriad of directions. In Postmodern philosophy, the possibility of communication is dismissed, let alone communication from God. In Biblical studies, the amount of knowledge required to come to firm conclusions concerning the meaning and application of the Bible grows every day. However, the Bible is not so pessimistic about its accessibility. Instead, it presents itself as a clear word, sufficient to guide and encourage Christians in every area of life. Having outlined in Part 1 a method for reading the Bible in order to understand it, *The Gift of Reading* Part 2 addresses the issues of hermeneutics or the theory of reading. After briefly surveying the major approaches to reading the Bible throughout the history of the Church, *The Gift of Reading* Part 2 argues for an understanding of the role of the text, reader, and author based on a Biblical epistemology and theology. Proposals from the EUROGEO Conference (Amsterdam, The Netherlands, 2-3 March 2017) This volume is dedicated to the study of three late, little-known biblical works that historically have been relegated to the lesser works of the New Testament. Reading 1 Peter, Jude, and 2 Peter underscores the light that these letters shed upon one

another and focuses on the snapshots they provide of early Christian communities as they encountered the social and religious environment in which they were situated. Careful reading of 1 Peter reveals the complex world of the post-apostolic period. Jude and 2 Peter provide a sober look at the early community's evolution in doctrinal and moral terms. Situated at the crossroads of rhetoric and fiction, the genre of *declamatio* offers its practitioners the freedom to experiment with new forms of discourse. This volume places the literariness of Roman declamation into the spotlight by showcasing its theoretical influences, stylistic devices, and generic conventions as related by Seneca the Elder, the author of the *Controversiae* and *Suasoriae*, which jointly make up the largest surviving collection of declamatory speeches from antiquity. Authored by an international group of leading scholars of Latin literature and rhetoric, the chapters explore not only the historical roles of individual declaimers, but also the physical and linguistic techniques upon which they collectively drew. In addition, the 'dark side of declamation' is illuminated by contributions on the competitiveness of the arena and the manipulative potential of declamatory skill and, in keeping with the overall treatment of declamation as a literary phenomenon, a section has also been dedicated to intertextuality. Drawing on thought-provoking analyses of Seneca the Elder's works, the volume highlights the

complexity of these texts and maps out, for the first time, the socio-cultural context for their composition, delivery, and reception, as well as providing a comprehensive, innovative, and up-to-date treatment of Roman declamation that will be essential for both students and scholars in the fields of Latin literature, Republican Roman history, and rhetoric. An essential textbook on 1–2 Peter and Jude for readers of all levels Scholars engage the best contemporary work on 1–2 Peter and Jude in this student-oriented book. The first four chapters in this collection—on authorship and pseudonymity, literary relationships among the three books, epistolary rhetoric, and apocalyptic elements—consider important, foundational issues related to all three epistles. These essays lay the groundwork for more focused chapters that examine theology and theory in 1 Peter as well a stylistic, theological, and thematic

overlap in Jude and 2 Peter. Features: A range of theological, literary, and theoretical approaches
Definitions for specialized terminology
Historical and cultural background information
Explanations of methodologies
A collection of essays that examines the Hebrew Bible using the methodology of Rolf P. Knierim of the Institute for Antiquity & Christianity in Claremont, CA. The studies in this volume investigate Isaiah's use of early sacred tradition, the editing and contextualization of oracles within the Isaianic tradition itself, and the interpretation of the book of Isaiah in later traditions (as in the various versions and interpretations of the text).
Provides educators with practical strategies, tools, and techniques for teaching critical reading skills to students in the social and natural sciences. Strong critical reading skills are an essential part of any student's academic success. Teaching these vital skills requires educators to develop and implement effective teaching strategies, often based on their own critical reading practices. *Critical Reading Across the Curriculum, Volume 2: Social and Natural Sciences* provides educators with expert insights, real-world methods, and proven strategies to build critical reading skills in students across disciplines. Drawing from the experience of seasoned classroom practitioners, this book presents a dozen essays that offer various applications of critical reading best practices in fields such as anthropology, biology, economics, engineering, political

science, and sociology. Clear, jargon-free chapters identify, explain, and illustrate best teaching practices for critical reading. Containing numerous practical examples and demonstrations, essays written by experts in their respective fields explain what critical reading requires for their discipline, as well as how to teach those skills in the classroom. Every essay includes a host of pedagogical activities, assignments, and projects that can be used directly or adapted for diverse teaching applications. This valuable book helps educators:

- Develop the skills students need to ask the right questions, consider sources, assess evidence, evaluate arguments, and reason critically
- Encourage students to practice critical reading skills with engaging exercises and activities
- Teach students to establish context and identify contextual connections
- Explain how to read for arguments, including content-based and conceptual arguments
- Adapt and apply teaching strategies to various curricula and disciplines

Critical Reading Across the Curriculum, Volume 2: Social and Natural Sciences is an ideal resource for educators in a wide range of areas, such as college and high school instructors in science and social science disciplines and instructors of graduate education courses.

In *Reading and Re-reading Scripture at Qumran*, Moshe J. Bernstein gathers over three decades worth of his essays on biblical interpretation in the Dead Sea Scrolls. They address the Genesis Apocryphon and 4Q252, as well various legal

texts and pesharim. The Kristen R. Bromley Guitar Method series is based on Dr. Bromley's extensive experience as a professional guitarist and noted educator. In 20 plus years, Dr. Kristen Bromley has instructed hundreds of university students in beginning, intermediate, and advanced level courses, along with child, adolescent, and adult learners. In this volume, Dr. Bromley helps guitarists learn how to play individual notes on the guitar while reading music written in standard music notation. The book begins as if a student has no prior knowledge of reading music notation or the location of notes on the guitar, and proceeds through playing notated music in any key in the open or first position on the guitar. If you want to learn how to (or get better) at reading notes with the guitar, this is the book for you! This method book includes:

- Online access to nearly 14 hours of in-depth video lessons by Dr. Bromley that specifically go over the materials in this book.
- 25 chapters of step-by-step instruction that cover how to read notes on the guitar.
- Over 360 songs and exercises, which can all be played right along with Dr. Bromley through the video lessons.
- Theory explanations of notes, keys, chromatic pitches, and major and minor scales.
- Right- and left-hand technique development, including alternate picking approaches.

Through a close examination of the scriptural text this book is a defence of the integrity of Genesis 1-2. While the book is set specifically against evolutionary

creationist treatments of these chapters as disharmonised and non-historical, it nevertheless serves to explain why any liberal biblical critical handling of the early chapters of Genesis is faulty. A quality pew and ministry Bible at a very economical price. - Complete text with subject headings and translators' footnotes.
